The Social Construction of Meaning John Yandell, 2013-09-27 This book takes a fresh look at secondary urban English classrooms and at what happens when students and their teachers explore literature collaboratively By closely examining what happens in English lessons minute by minute it reveals how literary texts function not as a valorised heritage to be transmitted but as a resource for the students work of cultural production and contestation The reading that is undertaken in classrooms has tended to be construed as either a poor substitute or merely a preparation for other reading particularly for that paradigmatic literacy event the absorbed and simultaneously discriminating consumption of the literary text by the independent private reader This book argues for a different understanding of what constitutes reading an understanding that is informed by historical and ethnographic perspectives and by psychological and semiotic theory It presents the case for a conception of reading as an active collaborative process of meaning making and for a fully social model of learning Drawing extensively on data gathered through classroom observation and filming of English lessons taught over the course of a year by two teachers in a

London secondary school the book explores students engagement with literary texts and the pedagogy that facilitates this engagement The book offers new insights into reading and reading literature in particular It challenges the paradigm of reading that is offered in government policy and the assumption common to much work within the field of new literacies that schooled literacy is the already known the default against which the alternative literacy practices of homes and communities can be defined It will be valuable reading for researchers teachers teacher educators and postgraduate students and will have particular appeal for those with an interest in the fields of English studies and literacy

Teaching Secondary English Mark Pike, 2003-10-30 What the book does extremely well is do describe the way things are in terms of the requirements of the Framework for Teaching English the curriculum and the new specifications and for this reason it is likely to be most useful to those contemplating English teaching in the maintained sector from outside returnees aspiring NQTs or those in the independent sector Times Educational Supplement Instead of taking us yet again on a tour through the four modalities of English this book's tripartite structure takes a refreshingly different approach by offering thought provoking argument grounded in classroom practicality Nick McGuinn University of York Students comments on *Teaching Secondary English* The book is written in clear digestible terms offering many practical ideas for teaching the key skills and the wide range of material encountered in the English classroom It is the kind of book which can be dipped into which is particularly useful for people who spend most of their time planning lessons *Teaching Secondary English* is a must for student teachers and NQTs It is a clear comprehensive and practical guidebook dealing not solely with theory and pedagogy but with the very real issues facing new teachers today It is clear that *Teaching Secondary English* unlike so many textbooks on the subject is written by someone with recent classroom experience and this helps the reader to trust and respect the advice it purports I certainly feel it is grounded in practicalities not pie in the sky theory that will not work in most real classrooms This book enables English teachers to implement change and rise to new challenges while remaining true to an ethically and socially just position which provides the rationale for their vocation The author describes and evaluates recent changes to English teaching brought about by initiatives such as the Literacy Strategy the new A levels and the requirement to focus on spiritual moral social and cultural development Examples of innovative teaching and learning strategies are provided throughout The author helps teachers to foster keen readers writers and communicators He shows how they can enable their students to acquire skills and knowledge as well as to recognize the value of aesthetic experience emotional literacy and spiritual and moral response to literature in their own lives and in their communities This book is essential reading for PGCE students as well as practising teachers and all those involved in English in education
