audiences It investigates how pleasure is stimulated by vocal musical and spectacular performances Early discussions centre on the construction of the composed text but then attention is given to performance and audience response Musical theatre contains disruptions and dissonances in its multiple texts it allows gaps for audiences to read playfully This combines with the voluptuous sensations of embodied emotion contagiously and viscerally shared between audience and stage and augmented through the presence of voice and music A number of features are discovered in the construction of musical theatre performance texts that allow them to engage the intense emotional attachment of their audiences and so achieve enormous popularity In doing this the book challenges the conception of musical theatre as only entertainment
