

SUSTAINABILITY

Sustainability refers to the principle of meeting our own needs without compromising the ability of future generations to meet their needs.

OVERVIEW

Sustainability assists in the preservation and renewal of natural resources, promoting ecological balance and biodiversity and preserving our planet for future generations.

However, achieving sustainability is no easy feat. One challenge is the lack of cooperation and coordination among stakeholders.

EXAMPLES

- 1. Renewable Energy:** Implementing solar panels or wind turbines to generate clean energy without contributing to air pollution.
- 2. Sustainable Agriculture:** Using organic farming methods to produce food that is free of pesticides and synthetic fertilizers. This can reduce runoff pollutants that get into the water stream.
