Knowing With The Heart Religious Experience And Belief In God:

Knowing with the Heart Roy Clouser, 2007-09-01 The famous scientist and philosopher Blaise Pascal memorably said that the heart has its reasons the mind will never know But too often it s forgotten that Pascal in referring to the heart s reasons was not talking about hunches or cozy feelings Instead he had in mind our intuitive knowledge of the first principles of number time space and motion And he believed God can be known in the same way so that belief in God has the same justification as scientific and mathematical principles Was he right In *Knowing with the Heart* Roy Clouser develops a broad compelling case for Pascal s position Against the current climate of religious relativism Clouser concludes that Christians are entitled to say they know God is real Written in clear and nontechnical language *Knowing with the Heart* is intended for believers concerned with the credentials of their faith and those who don t believe in God but are willing to investigate and reconsider

ThirdWay, 1999-06 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture *The Myth of Religious Neutrality, Revised Edition* Roy A. Clouser, 2005-05-15 Written for undergraduates the educated layperson and scholars in fields other than philosophy *The Myth of Religious Neutrality* offers a radical reinterpretation of the general relations between religion science and philosophy This new edition has been completely revised and updated by the author

Biology Through the Eyes of Faith Richard Wright, 2013-04-23 Newly Revised The Council of Christian Colleges and Universities Series Stressing the biblical message of stewardship biologist Richard T Wright celebrates the study of God s creation and examines the interaction of the life sciences with society in medicine genetics and the environment The author brings a biblical perspective to theories on origins contrasting creationism intelligent design and evolution Highlighting the unique nature of biology and its interaction with Christian thought Wright demonstrates that Christian stewardship can be the key to a sustainable future This comprehensive work one of a series cosponsored by the Council for Christian Colleges and Universities addresses the needs of the Christian student of biology to align science and faith It demonstrates that the study of biology penetrates to the core of human existence and has much to contribute to the construction of a consistent Christian worldview

Who's Afraid of Postmodernism? (The Church and Postmodern Culture) James K. A. Smith, 2006-04-01 The philosophies of French thinkers Derrida Lyotard and Foucault form the basis for postmodern thought and are seemingly at odds with the Christian faith However James K A Smith claims that their ideas have been misinterpreted and actually have a deep affinity with central Christian claims Each chapter opens with an illustration from a recent movie and concludes with a case study considering recent developments in the church that have attempted to respond to the postmodern condition such as the emerging church movement These case studies provide a concrete picture of how postmodern ideas can influence the way Christians think and worship This significant book winner of a Christianity Today 2007 Book Award avoids philosophical jargon and offers fuller explanation where needed It is the first book in the *Church and Postmodern Culture* series which provides practical applications for Christians engaged in ministry in

a postmodern world *Intelligent Design Creationism and Its Critics* Robert T. Pennock, 2001-12-21 The last decade saw the arrival of a new player in the creation evolution debate the intelligent design creationism IDC movement whose strategy is to act as the wedge to overturn Darwinism and scientific naturalism This anthology of writings by prominent creationists and their critics focuses on what is novel about the new movement It serves as a companion to Robert Pennock s *Tower of Babel* in which he criticizes the wedge movement as well as other new varieties of creationism The book contains articles previously published in specialized hard to find journals as well as new contributions Each section contains introductory background information articles by influential creationists and their critics and in some cases responses by the creationists The discussions cover IDC as a political movement IDC s philosophical attack on evolution the theological debate over the apparent conflict between evolution and the Bible IDC s scientific claims and philosopher Alvin Plantinga s critique of naturalism and evolution The book concludes with Pennock s *Why Creationism Should Not Be Taught in the Public Schools*

Memory, Amnesia, and the Hippocampal System Neal J. Cohen, Howard Eichenbaum, 1993 In this sweeping synthesis Neal J Cohen and Howard Eichenbaum bring together converging findings from neuropsychology neuroscience and cognitive science that provide the critical clues and constraints for developing a more comprehensive understanding of memory Specifically they offer a cognitive neuroscience theory of memory that accounts for the nature of memory impairment exhibited in human amnesia and animal models of amnesia that specifies the functional role played by the hippocampal system in memory and that provides further understanding of the componential structure of memory The authors central thesis is that the hippocampal system mediates a capacity for declarative memory the kind of memory that in humans supports conscious recollection and the explicit and flexible expression of memories They argue that this capacity emerges from a representation of critical relations among items in memory and that such a relational representation supports the ability to make inferences and generalizations from memory and to manipulate and flexibly express memory in countless ways In articulating such a description of the fundamental nature of declarative representation and of the mnemonic capabilities to which it gives rise the authors theory constitutes a major extension and elaboration of the earlier procedural declarative account of memory Support for this view is taken from a variety of experimental studies of amnesia in humans nonhuman primates and rodents Additional support is drawn from observations concerning the neuroanatomy and neurophysiology of the hippocampal system The data taken from divergent literatures are shown to converge on the central theme of hippocampal involvement in declarative memory across species and across behavioral paradigms *Faith Has Its Reasons* Kenneth Boa, Robert M. Bowman Jr., 2012-01-05 A most accessible but thoroughly practical primer on apologetics

Thinking About Christian Apologetics James K. Beilby, 2011-09-13 Most introductions to apologetics begin with the how to of defending the faith diving right into the major apologetic arguments and the body of evidence For those who want a more foundational look at this contested theological discipline this book examines Christian apologetics in its nature history

approaches objections and practice **Great Is the Lord** Ron Highfield, 2008-08-15 In keeping with the classic Christian tradition Great Is the Lord sets out the doctrine of God in a way that illumines the mind moves the heart and stirs the soul to praise the triune God Ron Highfield introduces students ministers and others to the traditional doctrine of God held by the majority of the church from the second to the twentieth century God is triune loving merciful gracious patient wise one simple omnipotent omniscient eternal omnipresent immutable impassible and glorious Irenically challenging open theism and process theology Highfield shows that the classical doctrine of God actually preserves our confidence in God's love and his liberating action better than its opponents do This traditional doctrine Highfield argues grounds our dignity and freedom in the center of reality the trinitarian life of God Highfield's work maintains the highest intellectual standards throughout even as it offers a true theology for the praise of God **The Crisis of Evangelical Christianity** Keith C. Sewell, 2016-04-26 In the broad context of Christianity as it developed over two millennia and with special reference to the last three centuries this discussion finds that Evangelicalism has repeatedly offered a reduced and distorted understanding of the faith The evangelical outlook is much less scriptural than evangelicals generally assume When it comes to appreciating the order of creation our calling to develop integral Christian thinking and living the religious significance of culture and the coming of the kingdom reductionist Evangelicalism struggles with its only rarely acknowledged deficiencies As a result we have all too often ended up with a Christianity shorn of its cosmic scope and wide cultural implications and restricted to institutional church life and the cultivation of private spiritual experience The consequences are frequently enervating and corrosive Without disregarding what is important in the past evangelicals are here challenged to take the Bible much more seriously and thereby transcend the limitations of their habitual reductionism Evangelicals are encouraged to embrace an integral and full orb'd understanding of Christian discipleship that will equip the faithful to address the deep and complex challenges of the twenty first century The Futures of Evangelicalism Craig G. Bartholomew, Robin Parry, Andrew West, 2004 An insightful assessment of the current state of evangelical affairs and the varied directions evangelicalism is poised to take Contributors include Alister McGrath Eugene Peterson I Howard Marshall Gregory J Laughery Stephen Lazarus Robin Parry and Andrew West **Becoming a Christian** Ola Hossjer, 2018-02-21 What influences the decision to become a Christian In the seventeenth century the famous scientist Blaise Pascal viewed this as a game with truth our adversary Pascal argued that we are in the game whether we like it or not Christianity is either true or not and we have to weigh the two alternatives According to Pascal's Wager we have everything to win and nothing to lose by taking a leap of faith and becoming a Christian In this book Ola Hossjer extends Pascal's Wager and argues that we respond to the Christian message very differently There are three main attitudes among people the first group follows Pascal's advice even if evidence before the decision is incomplete the second group requires convincing evidence at first and members of the third group will not become Christians regardless of evidence Hossjer contends that the decision consists of three components a religious disposition from birth

evidence and a willingness to act Although we weigh evidence and will differently our priorities may change after a life crisis so that we either reevaluate evidence or become more positive toward Christianity This is illustrated by a number of people who became Christians

Theology in Search of Foundations Randal Rauser, 2009-08-20 In the history of Western thought Christian theology was once considered to be the Queen of Sciences Today it has been marginalised by a prevailing scepticism Randal Rauser confronts the problem of developing a public voice for the theologian as engaged in true theological science while not compromising the commitment to the Christian community of faith This book posits a viable account of theological rationality justification and knowledge that avoids the twin pitfalls of modern rationalism and postmodern irrationalism Theology is freshly understood as a rigorous and rational truth seeking discipline that seeks theoretical understanding of divine reality Throughout the modern era the predominant epistemological position has been classical foundationalism a position now widely rejected by philosophers and theologians alike Philosophers recognize that it fails to achieve a plausible account of rationality justification or knowledge while theologians recognize the extent to which classical foundationalist strictures have distorted Christian doctrine In its place many philosophers and theologians alike have adopted a nonfoundationalist epistemology which is in turn often associated with a problematic alethic and metaphysical antirealism Engaging with the ideas of key thinkers from Descartes Locke and Kant to Bruce Marshall and Alvin Plantinga Rauser provides an accessible and provocative survey of the theological terrain of the modern and postmodern era arguing in favour of a return to a moderate foundationalism

Christian Theology and African Traditions Matthew Michael, 2013-05-21 Christian theology is increasingly recognized to be now a non western enterprise since the high concentrations of Christians in the world are no longer found in the Western societies Christian Theology and African Traditions takes seriously this present recognition of the southward movement of Christianity from the western world to a non western setting It seeks to reposition Christian theology and faith to engage the African traditions in classical category of theology proper bibliology anthropology Christology pneumatology soteriology ecclesiology and eschatology and provides unique insights and problems that these classical and systematic categories poses to African Christianity Similarly it provides theological blueprint for non Africans who are interested in knowing the nature and shape of the Christian theology in non western settings Consequently Christian Theology and African Traditions goes beyond the mere criticism of Western misrepresentation of African traditions to seeing how the Christian theology in its systematic character engages the African traditions With this methodological template the work describes in the space of twelve chapters the different classical teachings of the Christian faith on God scriptures spirits and demons the nature of the human person the persons of Christ salvation the Holy Spirit the church and the future life in dialogue with some specific traditions of the African people

What the Heavens Declare Lydia Jaeger, 2012-06-12 In her latest book What the Heavens Declare Lydia Jaeger provides a detailed analysis of the role of the theistic doctrine of creation in the rise of modern science with a particular

focus on the natural order As the author explains despite the common use of the expression laws of nature by both scientists and laymen there is a long standing tradition of philosophical debate about and even refusal of the notion that laws of nature might exist independently of a divine or human mind This work attempts to account for natural order in harmony with the religious worldview that significantly contributed to the original context in which modern science began the world seen as the creation of the triune God

All Things Wise and Wonderful E. Janet Warren,2021-01-19 The Covid 19 pandemic provoked many questions It is human nature to want to know how and why things happen The sovereign God has created a beautiful intricate world in which multiple factors interact to cause an event We are called to properly understand creation but often fail because we tend to be lazy fearful and self serving We make judgments based on often incorrect assumptions about cause and effect relations and we seek reassuring explanations for both trivial and serious events Christians have the added complication of figuring out God s role in making things happen All Things Wise and Wonderful examines what the Bible and Christian theology say about cause and effect how science views causation in the world and how human mind brains judge causation Using illustrations from everyday life it offers guidance for Christians to think and act wisely with respect to how and why things happen in creation

CAN FAITH IN GOD BECOME INSULT TO GOD? K.D. THOMAS,2014-01-01 You intend to honour and glorify God but very often end up in denigrating and insulting God Your faith says that God is totally just and upright but you try to bribe God by offering all sorts of gifts Your faith says that God knows everything including the past the present and the future and even your innermost secret thoughts and desires and what is best for a person yet you request God what He should do when where and how Your faith says that God is absolute love yet you think that whatever that happen in your life and the world like wars accidents natural calamities terrorism communal violence sickness murder and rape happen according to some mysterious plan of God Your faith says that God is a totally free and impartial judge and umpire but you try to influence and manipulate Him by your prayers vows pilgrimages and penances Your faith says that God is absolutely compassionate and merciful and yet you think that God may punish you and take revenge on you if you do not pray for His help Your faith says that God is an all perfect personality who lacks nothing but some of your faith practices depict God as an egoistic and insecure person who constantly seeks praise gratitude adoration and glorification from believers

Why Good Arguments Often Fail James W. Sire,2006-02-22 Why is it that solid rational arguments for the Christian faith often fail James Sire public defender of the Christian faith has asked himself that question Sometimes the arguments themselves just aren t that good How can we make them better Sire offers insights on making a persuasive case for Christ

Critical Race Theory and the Struggle at the Heart of Legal Education Paul Zwier,2023-09-21 This book is an examination of the reception of critical race theory CRT in America s legal education system Critical race theory has been roiling legal education since the aftermath of Obama s presidency The killings of unarmed Black people fueled Black Lives Matter BLM protests in law schools which created a sense of urgency behind the plea for the law to do

more to stop the killings of unarmed Black people Some BLM led protests called for faculty and administrators to be fired if they didn't act There has been an upsurge of states legislating against the teaching of CRT and law schools are struggling to respond How should legal education view CRT What are the neutral unifying values in the law that offer hope in the fight to alleviate the wave of racism that seems to continually batter law schools and society as a whole This book looks for answers and encourages the recommitment to the foundationalist beliefs of free speech equality and the due process of law
