Knowledge And Critical Pedagogy An Introduction Explorations Of Educational Purpose:

Knowledge and Critical Pedagogy Joe L. Kincheloe, 2008-06-19 In a globalized neo colonial world an insidious and often debilitating crisis of knowledge not only continues to undermine the quality of research produced by scholars but to also perpetuate a neo colonial and oppressive socio cultural political economic and educational system The lack of attention such issues receive in pedagogical institutions around the world undermines the value of education and its role as a force of social justice In this context these knowledge issues become a central concern of critical pedagogy As a mode of education that is dedicated to a rigorous form of knowledge work teachers and students as knowledge producers anti oppressive educational and social practices and diverse perspectives from multiple social locations critical pedagogy views dominant knowledge policies as a direct assault on its goals Knowledge and Critical Pedagogy An Introduction takes scholars through a critical review of the issues facing researchers and educators in the last years of the first decade of the twenty first century Refusing to assume the reader s familiarity with such issues but concurrently rebuffing the tendency to dumb down such complex issues the book serves as an excellent introduction to one of the most important and complicated issues of our time

Critical Pedagogy and Cognition Curry Stephenson Malott, 2011-02-10 This book simultaneously contributes to the fields of critical pedagogy and educational psychology in new and innovative ways by demonstrating how critical pedagogy postformal psychology and Enlightenment science seemingly separate and distinct disciplines are actually part of the same larger contextualized complex whole from the inner most developmentally fixed biological context of human faculties to the perpetually shifting socially and politically constructed context of individual schema and human civilization The text s uniqueness stems from its bold attempt to connect the postformal critical constructivist pedagogy work of Joe Kincheloe and others to Western science through a shared although previously misunderstood critique and rejection of crude forms of social control which the psychologists call behaviorism and Western scientists identify as mechanical philosophy This book therefore argues that critical pedagogy which includes among others anarchist Marxist feminist Indigenous globally conceived Afro Caribbean American and postmodern traditions and critical constructivist educational psychology have much to gain by engaging previously rejected work in critical solidarity that is without compromising one s values or democratic commitments The goal of this book is therefore to contribute to this vision of developing a more transgressive and transformational educational psychology

Evolution and Religion in American Education David E. Long, 2011-08-03 Evolution and Religion in American Education shines a light into one of America s dark educational corners exposing the regressive pedagogy that can invade science classrooms when school boards and state overseers take their eyes off the ball It sets out to examine the development of college students attitudes towards biological evolution through their lives The fascinating insights provided by interviewing students about their world views adds up to a compelling case for additional scrutiny of the way young people s educational experiences unfold as they consider and indeed in some cases reject one of

science's strongest and most cogent theoretical constructs. Inevitably open discussion and consideration of the theory of evolution can chip away at the mental framework constructed by Creationists eroding the foundations of their faith. The conceptual battleground is so fraught with logical challenges to Creationist dogma that in a number of cases students' exposure to such dangerous ideas is actively prevented. This book provides a detailed map of this astonishing struggle in today's America, a struggle many had thought was done and dusted with the onset of the Enlightenment. *Pedagogy, Praxis and Purpose in Education* C.M. Mulcahy, D.E. Mulcahy, D.G. Mulcahy, 2014-12-05. Recent years have shown the growth of federal legislation and programs having a profound impact on educational policy and practice and a decline in reliance on broadly based educational justifications. Paralleling this development has been the emergence of well-endowed and influential private foundations and an increase in corporate influence in shaping policy. In this volume the authors consider the discourse, rhetoric and underlying values that sustain these developments alongside those that underlie more longstanding and competing educational theories and practices. This volume highlights the importance of recognizing opposing conceptualizations of education, some more educationally productive than others, and their core values, approaches to student learning, strengths and weaknesses, and justification. The authors analyze and critique what Jane Roland Martin has referred to as the deep structure of educational thought and seek improved educational policy and practice with particular reference to curriculum and pedagogy. It features a comparative analysis of competing discourses including autocratic control, limited personal development and praxis. Development of Adult Thinking Eeva K. Kallio, 2020-03-11. Development of Adult Thinking is a timely synthesis and evaluation of the current knowledge and emerging issues relating to adult cognitive development and learning. Focusing on psychological and educational cutting-edge research as well as giving an overview of the key theorists such as Piaget and Kohlberg, Kallio and the team of expert contributors offer a holistic view on the development of adult thinking, representing perspectives from developmental, moral and social psychology as well as education and philosophy. These topics are divided into three sections: Adult cognitive and moral development, Perspectives of adult learning and Open questions and new approaches, offering introduction, analysis and directions for future research. This text is essential reading for students and researchers in developmental psychology and related courses as well as adult educators and teachers working in adult education. **Postformal Education** Jennifer M. Gidley, 2016-08-05. This book explains why the current education model, which was developed in the 19th century to meet the needs of industrial expansion, is obsolete. It points to the need for a new approach to education designed to prepare young people for global uncertainty, accelerating change and unprecedented complexity. The book offers a new educational philosophy to awaken the creative big picture and long-term thinking that will help equip students to face tomorrow's challenges. Inside, readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice. This dialogue reveals surprising links between play and wisdom, imagination and ecology, holism and

love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy

Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past

Gidley s challenge is to co evolve a radically new education All who seek to play a part must read this book

Teaching Africa George J. Sefa Dei, 2009-12-04 One is always struck by the brilliant work of George Sefa Dei but nothing so far has demonstrated his pedagogical leadership as much as the current project With a sense of purpose so pure and so thoroughly intellectual Dei shows why he must be credited with continuing the motivation and action for justice in education He has produced in this powerful volume Teaching Africa the same type of close reasoning that has given him credibility in the anti racist struggle in education Sustaining the case for the democratization of education and the revising of the pedagogical method to include Indigenous knowledge are the twin pillars of his style A key component of this new science of pedagogy is the crusade against any form of hegemonic education where one group of people assumes that they are the masters of everyone else Whether this happens in South Africa Canada United States India Iraq Brazil or China Dei s insights suggest that this hegemony of education in pluralistic and multi ethnic societies is a false construction We live pre eminently in a world of co cultures not cultures and sub cultures and once we understand this difference we will have a better approach to education and equity in the human condition
