law to different times and into different spaces The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes but also to achieve new and compelling interpretations of legal history As far as the relationship between space and law is concerned the book analyses experiences in which space operates as a determining factor of law e g in terms of a field of action for law Moreover it outlines the attempted scales of spatiality in order to develop legal historical research With reference to the connection between time and law the volume sketches the possibility of considering the factor of time not just as a descriptive tool but as an ascriptive moment quasi an inner feature of a legal problem thus making it possible to appreciate the synchronic aspects of the juridical experience As a whole the volume aims to present spatiotemporality as a challenge for legal history Indeed reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline
