Sins of the Shovel Rachel Morgan,2023-11-06 Rachel Morgan s frank and incisive history begins with Richard Wetherill s discovery of Mesa Verde in Colorado in 1888 Subsequent expeditions by amateurs looters and budding professional archaeologists abetted the devastation of Indigenous sites throughout the Southwest These expeditions became the proving grounds for different conceptions of what archaeology should be and how it should be practiced Ultimately revulsion at the work of nineteenth century explorers led to more rigorous and ethical norms as well as federal regulation but the core issues of how we ought best to engage with the evidence and people of the past remain live ones today Morgan an archaeologist knows well the field s history of racism and unethical behavior and she is both unsparing and even handed in assessing what happened in the Southwest and how it informs relations among people and with the planet today *Return to Troy* ,2015-05-26 Return to Troy presents essays by American and European classical scholars on

the Director's Cut of Troy a Hollywood film inspired by Homer's Iliad The book addresses major topics that are important for any twenty first century representation of ancient Greek myth and literature in the visual media not only in regard to Troy the portrayals of gods heroes and women director Wolfgang Petersen's epic technique anachronisms and supposed mistakes the fall of Troy in classical literature and on screen and the place of the Iliad in modern popular culture Unique features are an interview with the director a report on the complex filming process by his personal assistant and rare photographs taken during the original production of Troy *Digging for Troy* Jill Rubalcaba, Eric H. Sutton, 2021-03-30 Archaeology The Science of the Human Past provides students with a thorough understanding of what archaeology is and how it operates and familiarizes them with fundamental archaeological concepts and methods This volume introduces the basic components of archaeology including sites artifacts ecofacts remote sensing and excavation It discusses how archaeologists obtain and classify information and how they analyze this information to formulate and test models of what happened in the past Cultural resource management and the laws and regulations that deal with archaeology around the world are described Archaeology is placed in the context of contemporary issues from environmental problems to issues affecting Indigenous populations The sixth edition has been updated and simplified to create a more streamlined volume to meet the needs of the students and teachers for whom it is designed reflecting the latest developments in archaeological techniques and approaches Allowing students to understand the theoretical and scientific aspects of archaeology and how various archaeological perspectives and techniques help us understand how and what we know about the past Archaeology The Science of the Human Past is an ideal introduction to archaeology **Poetics of the Hive** Cristopher Hollingsworth, 2005-04 Cris Hollingsworth's waggle dance after scouting the rangiest field of literature Virgil and Homer down to Milton and Swift on to Plath and Byatt leads you to where the nectar hides He wisely roams extracting an anthology of poetry prose psychology history most of all perception that tops the bee's knees Paul West author of The Secret Life of Words Hollingsworth's wide ranging exploration of the image of the hive is impressive Poetics of the Hive and its panoply of references cannot fail to enrich university classrooms especially those devoted to both the visual arts and literature Dore Ashton author of A Fable of Modern Art Cris Hollingsworth's Poetics of the Hive is complex even daring in argument I'm even more impressed by his skill at an increasingly rare critical art the educating of argument from careful often brilliant analytical reading of literary texts Thomas R Edwards executive editor of Raritan A Quarterly Review A study to delight the passionate reader Poetics of the Hive tells the story of the evolution of the insect metaphor from antiquity to the multicultural present An experiment in the evolutionary biology of artistic form Poetics of the Hive freshly examines classic works of literature offering a view of poetic creation that complicates our ideas of the past and its formative role in modern consciousness and world literature In the first part of this lyrical synthesis of rhetoric visual and postmodern theory and cognitive science Cristopher Hollingsworth reveals the structure behind his metaphor redefining it as

an aesthetically and philosophically potent tableau that he calls the Hive He traces the Hive's evolution in epic poetry from Homer to Milton which establishes antithetical but complementary images of angelic and demonic bees that Swift Mandeville and Keats use variously to debate classical versus emerging ideas of the individual's relationship to society But the Hive becomes fully psychologized Hollingsworth argues only when its use by Conrad and Wells to explore Europe's colonial imagination of the Other is transformed by Kafka and Sartre into competing symbols of the modern self's existential condition
