*October 2001* Hilmy Sally,Charles L. Abernethy,2011-10-21 Only 4 percent of arable land in sub Saharan Africa is irrigated  
using just 2 percent of the available water resources Furthermore 18 percent of the area equipped for irrigation is not  
utilized at all and the intensity of use varies between 50 percent and 80 percent This highlights the huge potential available  
for intensifying and expanding irrigated area provided that the investments required can be successfully mobilized However  
it must be noted that if investments in irrigation are to yield satisfactory returns investments must also be made in a series of  
related activities Current global figures for the amount of private investment in irrigation confirm that good returns can  
indeed be achieved Prospects for sub Saharan Africa would be far more favorable if public development assistance  
particularly foreign direct investments did not show declining trends      **Trado Indian Directory** ,1968      **International**
