Letters from Klara Tove Jansson, 2017-06-01

The rich seam that is Jansson's adult prose continues with this penultimate collection of short stories written in her seventies at the height of her

Moomin fame and translated into English for the first time In these light footed beautifully crafted yet disquieting stories Jansson tells of discomfiting encounters unlooked for connections and moments of isolation that span generations and decades Letters From Klara proves yet again her mastery of this literary form *Bulletin of the Center for Children's Books*, 1992 Pastors in the Classics Leland Ryken, Philip Ryken, Todd Wilson, 2012 This one of a kind resource introduces pastors and seminarians to wisdom found in literary classics that can shape their ministries today *The Routledge Handbook of Stylistics* Michael Burke, 2023-05-29 This second edition of The Routledge Handbook of Stylistics provides a comprehensive introduction and reference point to key areas in the field of stylistics The four sections of the volume encompass a wide range of approaches from classical rhetoric to cognitive neuroscience Issues that are covered include historical perspectives centring on rhetoric formalism and functionalism the elements of stylistic analysis including foregrounding relevance theory conversation analysis narrative metaphor speech and thought presentation and point of view current areas of influential research such as cognitive poetics corpus stylistics critical stylistics multimodality creative writing and reader response four newly commissioned chapters in the emerging fields of cognitive grammar forensic linguistics the stylistics of children's literature and a corpus stylistic study of mental health issues All of these new chapters are written by leading researchers in their respective fields Each of the 33 chapters in this volume is written by a specialist Each chapter provides an introduction to the subject an overview of its history an instructive example of how to conduct a stylistic analysis a section with recommendations for practice and a discussion of possible future developments in the area for readers to follow up on The Routledge Handbook of Stylistics second edition is essential reading for researchers postgraduates and undergraduate students working in this area **Author Fictions** Ingo Berensmeyer, 2023-10-04 Fictional novelists and other author characters have been a staple of novels and stories from the early nineteenth century onwards What is it that attracts authors to representing their own kind in fiction Author Fictions addresses this question from a theoretical and historical perspective Narrative representations of literary authorship not only reflect the aesthetic convictions and social conditions of their actual authors or their time they also take an active part in negotiating and shaping these conditions The book unfolds the history of such author fictions in European and North American texts since the early nineteenth century as a literary history of literary authorship ranging from the Victorian bildungsroman to contemporary autofiction It combines rhetorical and sociological approaches to answer the question how literature makes authors Identifying author fictions as narratives that address the fragile material conditions of literary creation in the actual and symbolic economies of production Ingo Berensmeyer explores how these texts elaborate and manipulate concepts and models of authorship This book will be relevant to English American and comparative literary studies and to anyone interested in the topic of literary authorship **Prosthetic Immortalities** Adam R Rosenthal, 2024-09-17 Examining the links between today's ideas of radical life extension and age old notions of immortality From Plato's notion of generation to Derrida's concept of survival to such

modern phenomena as anti aging treatments cryogenics cloning and whole brain uploads Adam Rosenthal s *Prosthetic Immortalities* shows how the dream of indefinite life has always been a technological one a matter of prosthesis He argues that every biological instance of perpetual life from one celled organisms to rejuvenating jellyfish to Henrietta Lacks s immortal cancer cells always results in the transformation of the original being There can therefore be no certainty of immortality Yet because finite mortal life is already marked by difference division and change as Rosenthal concludes the problem of immortality will not cease to haunt us *Prosthetic Immortalities* examines the persistence of humans aspirations of deathlessness showing that the link between immortalization and prostheticization is not unique to a single period but is rather a ubiquitous element of the discourse of immortality encompassing both modern technoscientific efforts and religious discourses of an afterlife Rosenthal asks to what extent the emergence of a virtual posited immortal presence follows from the tenets of empirical science and not simply from the discourse of biology but also and more radically still from biological organization itself Rosenthal ultimately argues that the discovery of biological immortals lifeforms that naturally have indefinitely long lifespans such as cancer cells and bacteria present novel conceptual difficulties for traditional philosophical approaches to mortality and selfhood asking whether it is life itself that first births immortalizing prostheses
