NAS and NAE on Agenda Items at the World Radiocommunication Conference 2015 National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on the Views of the U.S. NAS and NAE on Agenda Items at Issue at the World Radiocommunication Conference 2015, 2013-11-29 The World Radiocommunication Conference WRC is a meeting of official delegations from over 140 nations and is organized by the International Telecommunication Union ITU Delegates meet every few years to negotiate proposals to changes in international radio spectrum regulations changes that would be enforced by the ITU internationally if approved Proposals are brought up during a WRC and then negotiated at the next WRC The time in between each WRC allows for national governments to work internally and with their regional counterparts to develop a consensus position on each proposal The consensus position can then be presented at the next WRC Each proposal is referred to as an agenda item and agenda items are specific and propose narrow yet potentially substantial changes to the use of the spectrum that can have significant impact on its users Most agenda items support the active use of the spectrum so it is important for vulnerable passive services to voice their concerns about potentially adverse effects on their operations Two U S passive services the passive Radio Astronomy Service RAS and the Earth Exploration Satellite Service EESS provide scientific observations of the universe and Earth through the use of advanced receiver technology with extreme sensitivity and the employment of complex noise reduction algorithms Even with such technology RAS and EESS are seriously adversely affected by what most active services would consider extremely low noise levels *Views of the U S NAS and NAE on Agenda Items at Issue at the World Radiocommunication Conference 2015* present the NAS and NAE s views on agenda items that affect RAS and EESS This report includes a list of each agenda item how it affects the programs and the committee s recommendations *Radically Speaking* Diane Bell, Renate Klein, 1996 The contributors to *Radically Speaking* show that a radical feminist analysis cuts across class race sexuality region religion and across the generations It is essential reading for Women s Studies sociology cultural studies and anyone interested in processes of social change The collection reveals the global reach of radical feminism and analyze the causes and solutions to patriarchal oppression Seventy writers discuss their ideas and practice of contemporary feminism *A Research Agenda for Housing* Markus Moos, 2019 Housing is one of the most pertinent issues of our time Shaped by rapid urbanization financialization and various changes in demography technology political ideology and public policy the provision of affordable adequate and suitable housing has become an increasingly challenging feat From high rise apartment towers constructed in global cities around the world to informal settlements rapidly expanding across the global south this volume focuses on how political economic and societal changes are shaping housing in a variety of contexts **Handbook of Democratic Innovation and Governance** Stephen Elstub, Oliver Escobar, 2019-12-27 Democratic innovations are proliferating in politics governance policy and public administration These new processes of public participation are reimagining the relationship between citizens and institutions This Handbook advances understanding of democratic innovations in theory and practice by

critically reviewing their importance throughout the world The overarching themes are a focus on citizens and their relationship to these innovations and the resulting effects on political equality The Handbook therefore offers a definitive overview of existing research on democratic innovations while also setting the agenda for future research and practice

Felix Klein David E. Rowe, 2025-05-29 This book presents a historical account of Felix Klein's *Comparative Reflections on Recent Research in Geometry* 1872 better known as his Erlangen Program Originally conceived and written when Klein was collaborating with Sophus Lie this bold essay initially made little impression on contemporary researchers Decades later however it eventually became a famous classic Eminent mathematicians hailed Klein's main message the role of invariants of transformation groups in geometry as presaging major developments in mathematics and physics The first part of this book focuses on the prehistory surrounding Klein's Erlangen Program stressing the motivations that led Klein to write it The core of the book Part II then presents a new translation of Klein's original text followed by detailed textual analysis aimed at guiding the reader through its rather terse and opaque prose Part III deals with its complicated reception history treated in four periods spanning the years from 1872 to 1930 This culminated during Klein's lifetime with his efforts to promote the Erlangen Program as a framework for interpreting Einstein's theory of relativity After his death in 1925 the viability of this framework became a contentious issue among leading differential geometers Part IV looks back on the transformations in mathematics that led to a modernized interpretation of Klein's message The book also explores in depth how the growing fame of the Erlangen Program undermined Klein's friendship with Sophus Lie leading to a dramatic public break between them in 1893 Beyond the Erlangen Program itself this book deals with many of Felix Klein's other works As an introduction to a largely forgotten world of ideas this study will appeal not only to experts but also to graduate students and all those with a serious interest in the history of modern mathematics *Russia's European Agenda and the Baltic States* Janina Šleivyte, 2009-12-16 This book analyses recent Russian European interaction including Russia's relations with the Baltic States it discusses the development of Russia's approach to the new security architecture in Europe resulting from the enlargement of both the EU and NATO and assesses the prospects for greater Russian engagement in European security frameworks **A Research Agenda for Cybersecurity Law and Policy** Roy Balleste, Gilles Doucet, Michelle L.D. Hanlon, 2025-01-09 This Research Agenda provides a roadmap for research in cybersecurity law and policy covering critical topics including geopolitics national security terrorism space cybersecurity data privacy and cloud computing It explores the opportunities and challenges associated with the emerging domain of outer space the development of autonomous systems including self-driving cars and uncrewed aircraft and space system ICT networks **Gids voor hedendaagse architectuur in Nederland** Paul Groenendijk, Piet Vollaard, 2004 Containing over 300 entries this guide presents an overview of the most recent developments in Dutch architecture and urban design from the 1980s to the present day Its compact shape practical layout and extensive indexes make this guide an indispensable source of inspiration and reference work on the practice of
