illuminating from Newtonian gravity and Newton's laws of mechanics to ballistics air drag and electricity The mathematical subjects range from algebra trigonometry geometry and calculus to differential equations Fourier series and theoretical and Monte Carlo probability Each chapter includes problems some three dozen in all that challenge readers to try their hand at applying what they have learned Just as in his other books of mathematical puzzles Nahin discusses the historical background of each problem gives many examples includes MATLAB codes and provides complete and detailed solutions at the end Mrs Perkins's Electric Quilt will appeal to students interested in new math and physics applications teachers looking for unusual examples to use in class and anyone who enjoys popular math books
