The Art of Identification Rex Ferguson, Melissa M. Littlefield, James Purdon, 2021-09-06 Since the mid nineteenth century there has been a notable acceleration in the development of the techniques used to confirm identity From fingerprints to photographs to DNA we have been rapidly amassing novel means of identification even as personal individual identity remains a complex chimera The Art of Identification examines how such processes are entangled within a wider

sphere of cultural identity formation Against the backdrop of an unstable modernity and the rapid rise and expansion of identificatory techniques this volume makes the case that identity and identification are mutually imbricated and that our best understanding of both concepts and technologies comes through the interdisciplinary analysis of science bureaucratic infrastructures and cultural artifacts With contributions from literary critics cultural historians scholars of film and new media a forensic anthropologist and a human bioarcheologist this book reflects upon the relationship between the bureaucratic scientific and technologically determined techniques of identification and the cultural contexts of art literature and screen media In doing so it opens the interpretive possibilities surrounding identification and pushes us to think about it as existing within a range of cultural influences that complicate the precise formulation meaning and reception of the concept In addition to the editors the contributors to this volume include Dorothy Butchard Patricia E Chu Jonathan Finn Rebecca Gowland Liv Hausken Matt Houlbrook Rob Lederer Andrew Mangham Victoria Stewart and Tim Thompson

The Play in the System Anna Watkins Fisher, 2020-09-21 Acknowledging the difficulty for artists in the twenty first century to effectively critique systems of power Anna Watkins Fisher theorizes parasitism a form of resistance in which artists comply with dominant structures as a

tool for practicing resistance from within *Raymond Williams at 100* Paul Stasi, 2021-04-07 Raymond Williams was by common consent one of the two most commanding intellectual figures in the New Left that emerged in Britain at the turn of the sixties the other being Edward Thompson Williams published in 1961 a text entitled *The Future of Marxism* In that essay Williams has some remarkable things to say about imperialism the successes of actually existing socialism balanced against its failures and the continued relevance of socialism as the horizon of human liberation He also makes a characteristic methodological point the relation between systems of thought and actual history is both complex and surprising The future of Marxism that is to say will not depend on dogma but will instead rest on historical developments on how well we are able to actualize Marx's ideals in our own unique conjuncture This volume takes up the challenge of reading and extending Williams's thought in light of the actual history that has occurred since his passing but with the same ideal of socialism as its guiding horizon If there is one thread visible throughout all of Williams's work it is the felt presence of a living thinking individual of a person continually testing ideas in experience in order to see whether they fit the world they are meant to describe The aim of this volume timed to coincide with what would have been Williams's 100th birthday is to test his ideas in our own experience and to engage Williams's work in ways that move past the familiar terrain that has grown around it We now know that experience is a dangerous category that community can be hijacked by the right as much as the left and that tradition contains as much conflict as commonality Those committed to Williams's work can easily find textual arguments or developments across his career to answer these charges and they have What our volume offers is a set of arguments by younger scholars influenced by Williams's writings that moves past some of these debates extending Williams's work into the 21st century testing and weighing his ideas in light of recent developments and contemporary intellectual culture In doing so we treat Williams's thought as one of those resources of hope which he famously suggested would sustain us At a time of deepening inequality and austerity and growing rightward reaction and yet simultaneously and with seeming dialectical necessity a renewed investment in socialism Williams might be exactly the kind of figure we need
