Naimuddin, 2018-05-23 These proceedings gather invited and contributed talks

presented at the XXII DAE BRNS High Energy Physics HEP Symposium which was held at the University of Delhi India on 12-16 December 2016. The contributions cover a variety of topics in particle physics, astroparticle physics, cosmology and related areas from both experimental and theoretical perspectives, namely: 1. Neutrino Physics, 2. Standard Model Physics including Electroweak Flavour Physics, 3. Beyond Standard Model Physics, 4. Heavy Ion Physics, 5. QCD Quantum Chromodynamics, 6. Particle Astrophysics, 7. Cosmology, 8. Future Experiments and Detector Development, 9. Formal Theory, and 10. Societal Applications, Medical Physics, Imaging etc. The DAE BRNS High Energy Physics Symposium is widely considered to be one of the leading symposiums in the field of Elementary Particle Physics, held every other year in India and supported by the Board of Research in Nuclear Sciences, BRNS, Department of Atomic Energy, DAE, India. As many as 400 physicists and researchers attended the 22nd Symposium to discuss the latest advances in the field. A poster session was also organized to highlight the work and findings of young researchers. Bringing together the essential content, the book offers a valuable resource for both beginning and advanced researchers in the field.

Radioactivity Transfer in Environment and Food Fokion K Vosniakos, 2012-04-26. The book deals with various consequences of major nuclear accidents such as in 1986 in Chernobyl and in 2011 in Fukushima. The public is extremely interested in learning more about the movements and risks posed by radiation in the environment related to food supply and food safety. Radionuclides are found in air, water, soil and even in us, not only after nuclear accidents because they occur also in nature. Every day we ingest and inhale radionuclides in our air and food and the water. This book provides a solid underpinning of the basic physical chemistry and biogeochemistry of naturally occurring and anthropogenic radioactivity. The mechanisms of radioactive element transfer in the atmosphere, tropospheric and stratospheric diffusion of radioactivity, environmental contamination from accidents and the impact of atmospheric pollution on the food chain, soil and plants are analyzed and the analytical methods are illustrated. The question of natural radioactivity concentration in building materials is addressed too. While the book contains many case studies and data for Greece, it is of general value. It contributes to the development of international environmentally safe standards and economically reasonable standard regulations based on justified radiological, social and economical legislation concepts.

Scientific Investigations Report, 2005. Advanced Radiation Protection Dosimetry Shaheen Dewji, Nolan E. Hertel, 2019-04-02. Although many radiation protection scientists and engineers use dose coefficients, few know the origin of those dose coefficients. This is the first book in over 40 years to address the topic of radiation protection dosimetry in intimate detail. Advanced Radiation Protection Dosimetry covers all methods used in radiation protection dosimetry, including advanced external and internal radiation dosimetry concepts and

regulatory applications This book is an ideal reference for both scientists and practitioners in radiation protection and students in graduate health physics and medical physics courses Features A much needed book filling a gap in the market in a rapidly expanding area Contains the history evolution and the most up to date computational dosimetry models Authored and edited by internationally recognized authorities and subject area specialists Interrogates both the origins and methodologies of dose coefficient calculation Incorporates the latest international guidance for radiation dosimetry and protection
