Links Between Beliefs and Cognitive Flexibility Jan Elen, Elmar Stahl, Rainer Bromme, Geraldine Clarebout, 2011-08-20 With the world and its structures becoming ever more complex and the nature of future employment becoming ever more unpredictable the notion of cognitive flexibility has a high profile in educational and psychological debate The contributions in this volume analyze the nature of cognitive flexibility as well as the impact of different types of beliefs on cognitive flexibility Making adequate decisions requires considering input from a variety of continuously evolving sources rather than adhering to predetermined procedures Adopting a position in a debate necessitates the critical evaluation of different alternatives while solving a problem entails selecting appropriate problem solving strategies Meanwhile studying requires students to integrate a range of interventions and treating a patient involves making a differential diagnosis The common factor cognitive flexibility lies at the core of effective functioning in complex domain specific environments Cognitive flexibility can be described as the disposition to consider diverse information elements while deciding on how to solve a problem or to execute a learning related task in a variety of domains The concept of disposition implies that individuals will not always demonstrate cognitive flexibility even if they are in principle able to act in a cognitively flexible way The notion does not require that alternatives are always deliberately considered which is why

this volume's tandem discussion of beliefs is key element of the discussion Beliefs play a central role in cognitive flexibility and relate to what individuals consider to be important valid and or true Of specific interest is the relationship between epistemological beliefs and cognitive flexibility especially as a particular subset of epistemological beliefs seems to be a prerequisite to a cognitively flexible disposition *Handbook of Epistemic Cognition* Jeffrey A. Greene, William A. Sandoval, Ivar Bråten, 2016-01-22 The Handbook of Epistemic Cognition brings together leading work from across disciplines to provide a comprehensive overview of an increasingly important topic how people acquire understand justify change and use knowledge in formal and informal contexts Research into inquiry understanding and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert like conceptualizations skills and performance Outside of academic domains issues of who and what to believe and how to integrate multiple sources of information into coherent and useful knowledge have arisen as primary challenges of the 21st century In six sections scholars write within and across fields to focus and advance the role of epistemic cognition in education With special attention to how researchers across disciplines can communicate and collaborate more effectively this book will be an invaluable resource for anyone interested in the future of knowledge and knowing Dr Jeffrey A Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill Dr William A Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education Information Studies Dr Ivar Br ten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo Norway Personal Epistemology and Teacher Education Jo Brownlee, Gregory Schraw, Donna Berthelsen, 2012-05-23 Personal Epistemology and Teacher Education edited by Joanne Brownlee Gregg Schraw and Donna Berthelsen provides an international perspective on teachers personal epistemology or beliefs about the nature of knowledge and knowing Research from The Netherlands Cyprus Australia United States Canada Norway and Taiwan is presented to provide diverse viewpoints on personal epistemology for early childhood primary secondary and tertiary teaching contexts The text provides a platform for cutting edge theory and research about how personal epistemology can be applied to the context of teacher education thereby making explicit the connection between personal epistemology and teaching and students learning outcomes Topics include Cultural differences in teacher epistemology and the impact on students learning Teachers epistemological beliefs and inclusion Teachers epistemology and reading lessons citizenship education and teaching science Epistemology in a social context Teachers epistemological beliefs and student autonomy Teacher education and analysis of preservice and practicing teachers Implications of teachers epistemological beliefs Connections to future practice Teacher education and teacher behaviours are foregrounded across the topics with an emphasis on the origin and composition of teachers epistemological beliefs and how universities motivate change through formal teacher education Teaching behaviours are discussed in relation to how teachers beliefs are related to the curricular

and pedagogical choices that they make in their classrooms assessment of learning outcomes and classroom management practices

Epistemic Fluency and Professional Education Lina Markauskaite, Peter Goodyear, 2016-09-21 This book by combining sociocultural material cognitive and embodied perspectives on human knowing offers a new and powerful conceptualisation of epistemic fluency a capacity that underpins knowledgeable professional action and innovation Using results from empirical studies of professional education programs the book sheds light on practical ways in which the development of epistemic fluency can be recognised and supported in higher education and in the transition to work The book provides a broader and deeper conception of epistemic fluency than previously available in the literature Epistemic fluency involves a set of capabilities that allow people to recognize and participate in different ways of knowing Such people are adept at combining different kinds of specialised and context dependent knowledge and at reconfiguring their work environment to see problems and solutions anew In practical terms the book addresses the following kinds of questions What does it take to be a productive member of a multidisciplinary team working on a complex problem What enables a person to integrate different types and fields of knowledge indeed different ways of knowing in order to make some well founded decisions and take actions in the world What personal knowledge resources are entailed in analysing a problem and describing an innovative solution such that the innovation can be shared in an organization or professional community How do people get better at these things and how can teachers in higher education help students develop these valued capacities The answers to these questions are central to a thorough understanding of what it means to become an effective knowledge worker and resourceful professional

Teachers' Personal Epistemologies Gregory Schraw, Jo Lunn Brownlee, Lori Olafson, Michelle Vander Veldt Brye, 2017-07-01 The focus of this book is to explore teachers evolving personal epistemologies or the beliefs we hold about the origin and development of knowledge in the context of teaching The chapters focus on a range of conceptual frameworks about how university and field based experiences influence the connections between teachers personal epistemologies and teaching practice In an earlier volume we investigated preservice and inservice teachers beliefs and teaching practices Brownlee Schraw and Berthelsen 2011 While we addressed the nature of teachers personal epistemologies learning and teaching practices and approaches for changing beliefs throughout teacher education programs the volume did not address conceptual frameworks for the development of teacher s personal epistemologies To address this gap the book is focused on teacher educators teachers and teacher education programmers in universities with an overall aim of highlighting how we might support preservice teachers involvement in learning that is challenging and inservice teachers engagement in professional experiences that promote changes in teaching practice We argue that teachers need to be encouraged to question their beliefs and develop increasingly sophisticated beliefs about their knowledge and their students knowledge that facilitate learning and intellectual growth
