Designing Knowledge Organizations takes an interdisciplinary and original approach to assess and synthesize the disciplines of knowledge management and organizational design drawing upon conceptual underpinnings and

practical experiences in these and related areas **Knowledge, Organizational Evolution, and Market Creation** Gita Sud de Surie, 2008-01-01 Knowledge Organizational Evolution and Market Creation presents an integrative framework for understanding organizational change in emerging economies the book distills a tremendous amount of research relevant for understanding the culture of business in India This book is important for its contribution to the literature on the rise of Indian business and economy It has a wide reaching theoretical scope and makes significant linkages with cognitive behavioral and cultural theories Ms Surie s research on Indian firms thus presents a rare glimpse into the organizational and economic forces that are globalizing Indian industry from steel to software Dinesh Sharma Far Eastern Economic Review An astute study that especially focuses on the invaluable qualities of entrepreneurship and distributive innovation Exhaustively researched and featuring appendices packed with additional tables and statistics of hard data Knowledge Organizational Evolution and Market Creation is especially recommended for college library business and economic studies shelves Midwest Book Review The Economics Shelf India has become a global economic powerhouse and Sud de Surie offers in this book the first systematic analysis of the global spread of Indian businesses She skillfully maps the foreign expansion of Indian firms in five different industries from steel automotive components and machinery to software and biotechnology showing that economic political and cultural factors need to be present in order for companies to internationalize successfully This book sets a new standard for research on international business It is essential reading for those interested in the increasing role of emerging companies in global competition Mauro F Guill n University of Pennsylvania US Where do new multinationals come from How do firms in developing economies become global players Gita Sud de Surie provides new perspectives on internationalization and the multinational corporation by focusing on firms in emerging markets rather than established multinationals in industrialized economies She shows that firms in developing countries are not passive recipients of technology rather the attempt to absorb new technologies builds capabilities and generates new aspirations propelling them from being adopters of technology to innovators and participants in the global knowledge economy Knowledge Organizational Evolution and Market Creation documents the emergence of the Indian multinational by looking at data from firms in the old economy such as those in manufacturing steel making automotive components and heavy machinery and the new economy such as software and biotechnology The author provides insights on knowledge transfer innovation and capability building processes through in depth case studies in these industries and suggests that both entrepreneurship and distributed innovation are critical for the growth of firms globally This book will be valuable for scholars in international management business policy and strategy organization and management theory economic sociology and history and technology and innovation management Analysts consultants and executives will find many useful insights in this book as well Interdisciplinary Knowledge Organization Rick Szostak, Claudio Gnoli, María López-Huertas, 2016-03-24 This book proposes a novel approach to classification discusses its myriad advantages and outlines how such an approach to

classification can best be pursued It encourages a collaborative effort toward the detailed development of such a classification This book is motivated by the increased importance of interdisciplinary scholarship in the academy and the widely perceived shortcomings of existing knowledge organization schemes in serving interdisciplinary scholarship It is designed for scholars of classification research knowledge organization the digital environment and interdisciplinarity itself The approach recommended blends a general classification with domain specific classification practices The book reaches a set of very strong conclusions Existing classification systems serve interdisciplinary research and teaching poorly A novel approach to classification grounded in the phenomena studied rather than disciplines would serve interdisciplinary scholarship much better It would also have advantages for disciplinary scholarship The productivity of scholarship would thus be increased This novel approach is entirely feasible Various concerns that might be raised can each be addressed The broad outlines of what a new classification would look like are developed This new approach might serve as a complement to or a substitute for existing classification systems Domain analysis can and should be employed in the pursuit of a general classification This will be particularly important with respect to interdisciplinary domains Though the impetus for this novel approach comes from interdisciplinarity it is also better suited to the needs of the Semantic Web and a digital environment more generally Though the primary focus of the book is on classification systems most chapters also address how the analysis could be extended to thesauri and ontologies The possibility of a universal thesaurus is explored The classification proposed has many of the advantages sought in ontologies for the Semantic Web The book is therefore of interest to scholars working in these areas as well
