Kahn* Per Olaf Fjeld,Emily Randall Fjeld,2019-10-04 Louis I Kahn The Nordic Latitudes is a new and personal reading of the architecture teachings and legacy of Louis I Kahn from Per Olaf Fjeld s perspective as a former student The book explores Kahn s life and work offering a unique take on one of the twentieth century s most important architects Kahn s Nordic and European ties are emphasized in this study that also covers his early childhood in Estonia his travels and his relationships with other architects including the Norwegian architect Arne Korsmo The authors have gathered personal reflections archival material and other student work to offer insight into the wisdom that Kahn imparted to his students in his famous masterclass Louis I Kahn The Nordic Latitudes addresses Kahn s legacy both personally and in terms of the profession documents a research trip the University of Pennsylvania s Louis I Kahn Collection and confronts the affiliation of Kahn s work with postmodernism **Recoding Architecture Pedagogy** Nathaniel Coleman,2025-03-25 Disabled by chasing curricular criteria required for accreditation and professional registration architecture schools are mostly compliance and reproduction machines serving the building industry As a corrective Recoding Architecture Pedagogy Insurgency and Invention asserts disciplinary knowledge over professional skills as the proper aim and focus of architecture education The insurgent pedagogy introduced subverts architecture and its teaching s capture by capitalism s dominant modes of production and consumption to reveal unexpected tactics for enlarging possibilities Grounded in architecture histories and theories philosophy and anarchism s emphasis on use and dissensus combined with PUNK s DIY ethos design studio emphasis on technicity is upended to reveal the subversive aim of intensifying tensions between doomed desires for artistic autonomy and intrinsic burdens of use constituting architecture as a discipline instead of seeking resolution some neutral middle ground or escape into banal practice or paper palaces By concentrating on what architecture education suppresses

tensions disavows its capture within the building industry or affirms commercial practice over disciplinary knowledge Recoding Architecture Pedagogy Insurgency and Invention cracks open horizons of possibility by showing how intensifying agonistic relationships between the myriad binaries that characterize architecture and its teaching is generative in ways conciliatory synthesis cathartic resolution and uncritical affirmation are not **Utopias and Architecture** Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

architectural history and theory gender studies and visual studies who wish to delve into Ruskin's theories and to further understand his capacity for thinking beyond the historical methods The book will also be of interest to architectural practitioners particularly Ruskin's theory of surface architecture Tradition as Mediation: Louis I. Architecture From the Outside In Robert Gutman, 2012-04-17 Architecture and sociology have been fickle friends over the past half century in the 1960s architects relied on sociological data for design solutions and sociologists were courted by the most prestigious design schools to lecture and teach Twenty years later at the height of postmodernism it was passe to be concerned with the sociological aspects of architecture Currently the rising importance of sustainability in building not to mention an economical crisis brought on in part by a real estate bubble have forced architects to consider themselves in a less autonomous way perhaps bringing the profession full circle back to a close relationship with sociology Through all these rises and dips Robert Gutman was a strong and steady voice for both architecture and sociology Gutman a sociologist by training infiltrated architecture's ranks in the mid 1960s and never looked back A teacher for over four decades at Princeton's School of Architecture Gutman wrote about architecture and taught generations of future architects all while maintaining an outsider status that allowed him to see the architectural profession in an insightful unique way

Spirituality in Architectural Education Julio Bermudez, 2021-10-15 How does spirituality enter the education of an architect Should it What do we mean by spirituality in the first place Isn't architectural education a training ground for professional practice and therefore technically and secularly oriented Is there even room to add something as esoteric if not controversial as spirituality to an already packed university curriculum The humanistic and artistic roots of architecture certainly invite us to consider dimensions well beyond the instrumental including spirituality But how would we teach such a thing And why if spirituality is indeed relevant to learning architecture have we heard so little about it Spirituality in Architectural Education addresses these and many other

important philosophical disciplinary pedagogic and practical questions Grounded on the twelve year old Walton Critic Program at the Catholic University of America School of Architecture and Planning this book offers solid arguments and insightful reflections on the role that big questions and spiritual sensibility ought to play in the architectural academy today Using 11 design studios as stopping grounds the volume takes the reader into a journey full of meaningful interrogations pedagogic techniques challenging realizations and beautiful designs Essays from renowned architects Craig W Hartman Juhani Pallasmaa Alberto Campo Baeza Claudio Silvestrin Eliana B rmida Michael J Crosbie Prem Chandavarkar Rick Joy Susan Jones and Daniel Libeskind open new vistas on the impact of spirituality in architectural education and practice All this work is contextualized within the ongoing discussion of the role of spirituality and religion in higher education at large The result is an unprecedented volume that starts a long awaited conversation that will advance architectural schooling ACSA Distinguished Professor Julio Bermudez with recognized expertise on spirituality in architecture will be the guide in this fascinating and contemplative journey

Precedented Environmental Futures Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment
