as extreme weather events provide abundant proof of its reality religious leaders can no longer ignore the fact that the human has become a geologic force a force that must be re educated and re formed in order to guarantee safe passage into a sustainable future Hopefully Jesuits and their lay partners can continue to provide leadership in regard to this issue correctly identified by Fr Adolfo Nicol s SJ as a top priority In this particular context the role of religions and their valuable contributions must be evaluated Religion s role is not simply one of morality rather it seeks especially in Christianity to show the face of God It is out of this relation that believers then seek to live towards the good especially in relation to their neighbours creation and God Religious believers may have failed severely in communicating this relationship in the twenty first century This publication gathers together a roster of Western and Asian experts contributions from various fields of knowledge related to ecology anthropology religions and ethics economics technology and to environmental and health protection studies This collection of essays embracing a wide scope of current topics theme and questions will renew awareness of the ecological dilemma and stimulate reflection on its spiritual and social dimensions
