Shigo, Edwin van Horn Larson, 1969 This guide has been prepared to help you estimate the extent and severity of discoloration and decay in northern hardwood trees Though this certainly is not the last word on the subject our research in this has progressed to the point where our findings combined with the findings of others can be put to practical use By dissecting living trees and studying the organisms that infect them we now know that discoloration and decay develop in certain definite patterns And the patterns of discoloration and decay within the tree can be predicted from external signs Discoloration and decay are the most serious defects of northern hardwood trees In speaking of defect we must distinguish between injury and damage Injury harms the tree damage lowers the quality of the wood For example a disease like vascular wilt may kill the tree but do no damage to the wood But an insect like the cambium miner may do very little harm to the tree yet do great damage to the wood The unseen damage done to a tree is important in the economics of forestry Every operation in growing a tree harvesting it and converting it into products costs time and money And after all the time and money have been spent on a tree the product made from it may prove to be not worth the effort and the tree might have been used more profitably for some other product that does not require high quality wood The increased use of veneer offers an illustration A veneer log brings top prices But its actual value may not become apparent till it is put on a lathe and peeled A log that looks very good and sound to the core may have minute streaks of discoloration scattered all through it so that all the veneer it produces is badly streaked with defects On the other hand a log that has a rotten core surrounded by clear wood may produce the highest quality of veneer So it is not so important how much discoloration and decay a tree has but when these defects are in a tree The pattern of the discoloration and decay that is the important thing **Guide to Forestry** Joseph
