Latimer,Philipp Maume,2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets It is written by two authors who represent both the new world Australia and the old world Germany The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa Asia the Middle East and South America After every boom and bust legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media Little regard is paid to existing regulation or the lessons learned from earlier regulation The result is the continuing enactment of redundant and overlapping disclosure laws Since financial markets are often described as markets for information the failure to ensure disclosure is at the heart of financial services regulation This book argues that the solution to the failure of disclosure is a brief easily understood principles based plain English safety net amendment to statute law such as you must keep the financial market fully informed a measure that would support effective mandatory continuous disclosure of information to financial markets This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure It examines the adequacy of common law and civil law concerning broker client disclosure and concludes that industry licensing in itself fails to keep the market informed While recognizing the failures of securities commissions to achieve good disclosure in financial markets it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange Coregulation builds on financial market self regulation and is best described in the words of one time SEC Chairman William O Douglas who in the
