Guide To Organisation Design Creating High Performing And Adaptable Enterprises:

Guide to Organisation Design Naomi Stanford, 2007-07-01 Business failure is not limited to start ups In America alone between 1990 and 2000 there were over 6.3 million business start ups and over 5.7 million business shut downs Risk of failure can be greatly reduced through effective organisational design that encourages high performance and adaptability to changing circumstances Organisation design is a straightforward business process but curiously managers rarely talk about it and even more rarely take steps to consciously design or redesign their business for success This new Economist guide explores the five principles of effective organisation design which are that it must be driven by the business strategy and the operating context not by a new IT system a new leader wanting to make an impact or some other non business reason involve holistic thinking about the organisation be for the future rather than for now not to be undertaken lightly it is resource intensive even when going well be seen as a fundamental process not a repair job Racing cars are designed and built They are then kept in good repair *The Economist Guide to Organisation Design 2nd Edition* Naomi Stanford, 2015-02-26 Thousands of established businesses fail every year because of the way they are organised or re organised Business survival can depend not only on whether its structures and reporting lines meet the needs of the market but also whether they can adapt in the face of a rapidly changing business environment Yet managers seldom talk coherently about structuring or restructuring their operations let alone take a systematic approach to this vital issue Too often companies are restructured for the wrong reasons for example because a new CEO wants to make an impact or to work around a new IT system This revised and updated Economist Guide shows how leaders should think about and implement the design of a company using five easy to use guiding principles Design a company around its strategy and the operating context not for ulterior or non business reasons Think holistically don't restructure just one division without taking into account other operations Consider future markets customers and trends not just what works best now Invest time and resources a redesign can be complicated to implement and must be done without disrupting daily activities and Go back to the basics of how the company operates and its market position this is not a repair job to fix a short term problem Political Entrepreneurship Josef Lentsch, 2018-11-20 This book demonstrates how political entrepreneurs entrepreneurially minded citizens who launch innovative political start ups can drive political change Building on unique insights rich examples and personal stories of centrist political entrepreneurs distilled from 40 in depth interviews the author guides readers through key stages of political entrepreneurship and shows how to master them By equally highlighting successes and failures the book reveals how political entrepreneurs actually go about producing transformative political change In light of the populist challenge and the decline of traditional political parties the book also offers an entertaining backstage view and first hand insights into the successes of En Marche in France Ciudadanos in Spain NEOS in Austria and other centrist political startups It provides practical advice on how to learn from and replicate their successes Political practitioners and other politically interested

readers will find a useful theory of Political Entrepreneurship what it is how it works and what its role is in 21st century democracies Most of all they will find essential reproducible tools and methods You have read a lot about startups in business but if you want to know how Silicon Valley style startups look in politics read this Its author is not only writing about political entrepreneurs he is one of them Ivan Krastev Chairman of the Centre for Liberal Strategies in Sofia and permanent Fellow at the Institute of Human Sciences in Vienna No one understands better what it takes to take a political start up from ideation to the parliament than Josef Lentsch In Political Entrepreneurship he combines first hand experience with a thoughtful review of what we know about entrepreneurship in the interest of society Johanna Mair Professor of Organization Strategy and Leadership at the Hertie School of Governance and Co Director Global Innovation for Impact Lab at Stanford University Josef Lentsch has produced a fascinating commanding guide to the new insurgent players shaking up traditional party systems and reinvigorating liberal politics Political Entrepreneurship is essential reading for anyone who wants to understand today s fragmented and disrupted European politics and the European politics of the future Jeremy Cliffe Charlemagne columnist The Economist The rarest of events has occurred a new political species has appeared in the European eco system the centrist political start up From Macron s En Marche in France to Spain s Ciudadanos a new type of political actor has emerged Few are better positioned to tell this Europe wide story than Josef Lentsch who has had a front seat view on this important political transformation that is shaking Europe A dramatic and important account Daniel Ziblatt Eaton Professor of Government Harvard University and co author of How Democracies Die

The Great Disruption The Economist, Adrian Wooldridge, 2015-06-02 The Great Disruption is a collection drawn from Adrian Wooldridge s influential Schumpeter columns in The Economist addressing the causes and profound consequences of the unprecedented disruption of business over the past five years The Great Disruption has many causes The internet is spreading faster than any previous technology Emerging markets are challenging the west s dominance of innovation as well as manufacturing Clever management techniques such as frugal innovation are forcing companies to rethink pricing Robots are advancing from the factory floor into the service sector But these developments are all combining together to shake business life and indeed life in general to its foundations The Great Disruption is producing a new class of winners many of whom are still unfamiliar Asian has more female billionaires and CEOs than Europe for example It is also producing a growing class of losers old fashioned universities that want to continue to operate in the world of talk and chalk companies that refuse to acknowledge that competition is now at warp speed and business people who think that we still live in the world of company man It is forcing everybody to adapt or die workers realize that they will have to jump from job to job and indeed from career to career and institutions realize that they need to remain adaptable and flexible The Great Disruption is all the more testing because it coincides with the Great Stagnation The financial crisis has not only reduced most people s living standards in the west It has also revealed that the boom years of 2000 2007 were built on credit individuals and governments were borrowing money to

pay for lifestyles that no longer had any real justification Employees are having to cope with unprecedented change at a time when they are also seeing their incomes flat or declining Companies are having to respond to revolutionary innovations even as they are seeing their overall markets contract We are all having to run faster in order to stay in the same place This book begins with a long introduction explaining the thesis of the book and setting it in a broad historical context It will also introduce readers to Joseph Schumpeter and explain why his ideas about creative destruction are particularly valuable today

INTERNATIONAL SYMPOSIUM SYMORG 2014 Aleksandar Marković,Sladana Barjaktarović Rakočević,2014-06-05

Understanding the Military Design Movement Ben Zweibelson,2023-06-09 This book explains the history and development of the military design movement featuring case studies from key modern militaries Written by a practitioner the work shows how modern militaries think and arrange actions in time and space for security affairs and why designers are disrupting challenging and reconceptualizing everything previously upheld as sacred on the battlefield It is the first book to thoroughly explain what military design is where it came from and how it works at deep philosophically grounded levels and why it is potentially the most controversial development in generations of war fighters The work explains the tangled origins of commercial design and that of designing modern warfare the rise of various design movements and how today s military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations Why does our species conceptualize war as such and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy The book

explains design stories from the Israel Defense Force the US Army the US Marine Corps the Canadian Armed Forces and the Australian Defence Force for the first time and includes the theory doctrine organizational culture and key actors involved Ultimately this book is about how small communities of practice are challenging the foundations of modern defence thinking This book will be of much interest to students of military and strategic studies defence studies and security studies as well as design educators and military professionals
