Sport Diver Manual Jeppesen Sanderson,1984-12 **Scuba** James A. Lapenta,2014-02-06 SCUBA is a fun relaxing educational interesting and if approached properly safe activity it is nonetheless a sport that has risks SCUBA diving is in fact an extreme sport that can injure or even kill very quickly and in some very nasty ways What we are doing is entering an alien environment that is normally hostile to human life We cannot breathe in water without some kind of mechanical assistance These are facts and the details should be covered in every Open Water OW class All too often in today's society however people do not want to take the time to properly prepare and get the education to safely take on new tasks Some agencies appear to have responded to this by developing training programs that turn out high numbers of certified divers in shorter time frames necessitating the reduction of time spent on what I consider to be some necessary basic skills While this

has resulted in great numbers of new divers entering the water it has not resulted in many of those divers staying in the water New divers are often given just enough training to enable them to dive in the most benign conditions under close supervision Even then there are still those who find out their initial training was just not adequate It is at this point that they either make the decision to get more training or they leave the sport The latter happens all too often The former when it does happen does not always occur for the right reasons Students should return to training to expand their diving and learn new skills they should not have to return for new training just to be able to enjoy the sport safely To require students to come back for basic information is something I find very troubling and in some cases has actually cost divers their lives A lack of rescue instruction has resulted in a number of diver deaths when buddies did not know how to drop weights support a diver at the surface or even stay in contact with their buddy This is another area frequently talked about but all too often not actually put into practice The concept of always diving with a buddy and just what that means in the real world is often given too little attention Unfortunately it is impossible to foresee every conceivable situation that can arise but there are many basic issues that can be covered The following chapters will hopefully address much of what is being overlooked or delayed in many programs as they exist today It is my hope that this information also finds its way into the hands of those who have not yet begun the training process I have included a chapter on how to select an instructor based on the quality of instruction and the content of the course In some cases these classes may cost more than the less comprehensive courses also available but usually they do not In fact when you consider the additional skills and education gained from a more comprehensive course you will find that you have received much more value for each dollar spent In addition you gain priceless benefits in the form of greater confidence enjoyment skills and most importantly safety Enjoy and dive safe **Scuba James A.**

Lapenta, 2016-11-10 Building on his first book SCUBA A Practical Guide for the New Diver James Lapenta addresses what is most often the next step in diver training Advanced Level or Advanced Open Water training is often taken by divers to gain additional skills and knowledge It is also taken to allow them to gain access to more challenging dives and dive sites These also pose a greater degree of risk to the individual Unfortunately some advanced classes are no more than a taste or tour of advanced level dives The divers do not get the new knowledge and skills required to safely embark on these dives In order to safely pursue these dives James has outlined the steps to take to reduce the risk of injury and worse From describing the dives to offering advice on the content one should expect as well as selecting an instructor he offers new and not so new divers guidance Additional sections on equipment options air supply management dive planning and dive selection for maximum learning potential are looked at Also included is a section on a subject often overlooked in recreational SCUBA diving the after effects of a diving accident and rescue recovery on the rescuer and witnesses to the event Post Traumatic Stress in Recreational Dive Rescues is a real possibility and one that must be looked at when executing dives with greater risk Safety in training and after training is the heart of this work and the driving force behind its publication James has

experienced the best in training and that which left something to be desired He gives examples of both throughout the work If you do not have his first book it is highly recommended that you also acquire it as a companion to this one While they do contain some sections of the same information there are sections in the first book that are not included in this that are highly beneficial
