Kennedy, 2006-01-18 Written by three of the most respected energy professionals in the industry this fifth edition of a bestseller is an energy manager's guide to the most important areas of energy cost cutting. It examines the core objectives of energy management and illustrates the latest and most effective strategies, techniques, and tools for improving lighting efficiency, combustion processes, steam generation, distribution, and industrial waste reutilization. The book thoroughly brings up to date such topics as energy system management, energy auditing, rate structures, economic evaluation, HVAC optimization, control systems, and computers, process energy, renewable energy, and industrial water management.

Guide to Energy Management, Eighth Edition - International Version Barney L. Capehart, William J. Kennedy, Wayne C. Turner, 2020-11-26 This new International Version includes all material covered in the standard eighth edition but numerical data and calculations are expressed in Systeme International (SI) units. Completely revised, this latest edition includes new chapters on electrical systems, motors and drives, commissioning, and human behavior and facility energy management. Also updated are chapters on lighting, HVAC systems, web-based building automation control systems, green buildings, and greenhouse gas management. Written by respected professionals, this book examines objectives of energy management and illustrates techniques proven effective for achieving results.

Handbook of Energy Engineering, Sixth Edition Albert Thumann, D. Paul Mehta, 2001-01-31 This fully updated comprehensive reference will guide you step by step in applying the principles of energy engineering and management to the design of electrical, HVAC, utility, process, and building systems for both new and retrofit projects. You will learn how to do an energy analysis of any system. Detailed presentations cover electrical system optimization, state-of-the-art lighting and lighting controls, thermal storage, cogeneration, HVAC system optimization, HVAC and building controls, and computer technologies. The fifth edition includes a new chapter covering codes, standards, and legislation, as well as a new chapter on compressed air systems. You will also find coverage on use of innovative third-party financing mechanisms such as performance contracting to implement energy cost reduction measures. The text is thoroughly illustrated with tables, graphs, diagrams, and sample problems with worked-out solutions.
