Good Choice Preservation Manual:

The Oral History Manual Barbara W. Sommer, Mary Kay Quinlan, 2024-07-23 The Oral History Manual Fourth Edition is a comprehensive and user friendly book designed to take novice or experienced oral historians through the entire life cycle of creating an oral history project from idea through planning interviewing caring for and making oral history interviews accessible It includes updated information on evolving technology including the use of and challenges associated with automated transcription apps ethical and practical considerations related to oral history and social justice including interviews with people experiencing trauma and challenges associated with real time interviews conducted in the wake of natural and human caused disasters It emphasizes that an oral historian s work is not finished when the recorder is turned off describing in detail the importance of fully processing and preserving oral histories and related materials The book emphasizes the importance of oral history practitioners providing context for their work so researchers and others who encounter the materials in the future will understand fully the circumstances in which the oral histories were created The Oral History Manual Fourth Edition also provides readers background on the evolution of oral history practice and includes appendices with sample forms that oral historians will find useful as they develop their own projects Guide for Use of Wood Preservatives in Historic Structures Stan T. Lebow, 2012 This document provides guidance on wood preservation options in the context of historic preservation Preserving wooden building materials is critical to historic preservation practitioners Biodeterioration can be minimized through design construction practices maintenance and if necessary by use of wood preservatives Moisture is the primary cause of biodeterioration and if exposure to moisture cannot be prevented the application of preservatives or use of pressure treated wood may be warranted The Secretary of Interior s Standards for the Treatment of Historic Properties emphasize retaining the historic character of a property including distinctive materials features and spatial relationships Existing conditions should be carefully evaluated to determine the appropriate level of intervention Wood preservatives are generally grouped into two categories preservatives used for in place field remedial treatment and preservatives used for pressure treatments A limitation of in place treatments is that they cannot be forced deeply into the wood under pressure However they can be applied into the center of large wooden members via treatment holes These preservatives may be available as liquids rods or pastes Pressure treated wood has much deeper and more uniform preservative penetration than wood treated with other methods The type of pressure treated wood is often dependent on the requirements of the specific application To guide selection of pressure treated wood the American Wood Protection Association developed Use Category System standards Other preservative characteristics such as color odor and surface oiliness may also be relevant Guidelines for selection and application of field treatments and for selection and specification of pressure treated wood are provided in this document *A Graveyard Preservation Primer* Lynette Strangstad, 2013-08-28 A Graveyard Preservation Primer has proven itself to be a time tested resource for those who are

seeking information regarding the protection and preservation of historic graveyards It was first written to help stewards of early burial grounds responsibly and effectively preserve their graveyards Much information found in the first edition of the book remains valid today Still much has changed in the twenty five years since its first publication and the new edition reflects these changes Attitudes and the understanding of historic graveyards as an important cultural resource have grown and developed over the years Likewise changes in treatments have also taken place Perhaps the most dramatic change in burial ground preservation is in the world of technology Changes in computers and the way we use them have also changed preservation practices in historic graveyards Discussion of technological changes in the new edition includes those in mapping surveying photography archaeology and other areas of evaluation and planning Consideration is given too to maintenance and conservation treatments including both traditional and newer treatments for stone concrete and metals Metals were not discussed in the earlier editions and protection and preservation of the landscape as it relates to graveyards is an expanded focus of this book The historic preservation of cemeteries and burial grounds is an aspect within the discipline of historic preservation that is unknown to many Those whose responsibility is the care of these historic sites may be unfamiliar with appropriate approaches to such areas as documentation planning maintenance and conservation Unwitting personnel can do irreparable harm to these important cultural resources The Primer is an effort to protect historic cultural resources by breaching the gap between maintenance staff cemetery boards friends groups and graveyard preservation professionals by offering readily available responsible information regarding graveyard protection and preservation It is also designed to assist those who would undertake a preservation project in the reclaiming of a neglected or abandoned historic cemetery The book is generously illustrated with diagrams and photos illustrating procedures and gravemarker and graveyard forms styles and materials The appendix section is completely updated and expanded offering a worthwhile resource in itself

Guide for Use of Wood Preservatives in Historic Structures Stan LeBow, Ronald W. Anthony, 2012-12-13

NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price Wood preservatives are generally grouped into two categories preservatives used for in place field remedial treatment and preservatives used for pressure treatments A limitation of in place treatments is that they cannot be forced deeply into the wood under pressure However they can be applied into the center of large wooden members via treatment holes These preservatives may be available as liquids rods or pastes Pressure treated wood has much deeper and more uniform preservative penetration than wood treated with other methods The type of pressure treated wood is often dependent on the requirements of the specific application To guide selection of pressure treated wood the American Wood Protection Association developed Use Category System standards Other preservative characteristics such as color odor and surface oiliness may also be relevant Guidelines for selection and application of field treatments and for selection and specification of pressure treated wood are provided in this document Related Products Nondestructive Evaluation of Wood is available here

Department of Transportation,1979 **Aviation Unit and Intermediate Maintenance Manual** ,1991 *AASHTO Maintenance Manual for Roadways and Bridges* Kenneth A. Brewer,American Association of State Highway and Transportation Officials,2007 The Royal Marsden Manual of Cancer Nursing Procedures Sara Lister,Lisa Dougherty,Louise McNamara,2018-11-20 The Royal Marsden is the world s first hospital dedicated to cancer diagnosis treatment research and education a centre of excellence with an international reputation for ground breaking research and pioneering the very latest in cancer treatments and technologies as well as specialising in cancer diagnosis and education This companion volume to the internationally successful The Royal Marsden Manual of Clinical Nursing Procedures is designed to support practitioners who work specifically with oncology patients by providing detailed evidence based procedures and rationale and problem solving guidance on all aspects of oncology nursing The Royal Marsden Manual of Cancer Nursing Procedures Is organized and structured to represent the needs of the patient along their care pathway Provides the latest evidence underpinning all procedures Includes information on haematological procedures pain assessment and management wound care oncological emergencies and end of life care Gives detailed guidelines on supporting patients living with cancer with practical information on such things as benefits exercise and nutrition The Royal Marsden Manual of Cancer Nursing Procedures is an invaluable definitive resource for all those involved in the provision of cancer care and support to patients and their families **The Bedford Guide for College Writers with Reader, Research Manual, and Handbook with 2009 MLA and 2010 APA Updates** X. J. Kennedy,Dorothy M. Kennedy,Marcia F. Muth,2010-04 When it was first published twenty years ago The Bedford Guide for College Writers brought a lively and innovative new approach to the teaching of writing Since that time authors X J and Dorothy M Kennedy

have won praise for their friendly tone and their view apparent on every page of the text that writing is the usually surprising
 often rewarding art of thinking while working with language More recently experienced teacher and writer Marcia F Muth
 joined the author team adding more practical advice to help all students even those underprepared for college work become
 successful academic writers While retaining the highly praised Kennedy touch The Bedford Guide continues to evolve to meet
 classroom needs The new edition does even more to build essential academic writing skills with expanded coverage of
 audience analysis source based writing argumentation and reasoning and more *The Lancet* ,1895 *Resources in*
