Googlization Of Everything Updated Edition 12 By Vaidhyanathan Siva Paperback 2012:

The Googlization of Everything Siva Vaidhyanathan, 2012-03-13 In the beginning the World Wide Web was exciting and open to the point of anarchy a vast and intimidating repository of unindexed confusion Into this creative chaos came Google with its dazzling mission To organize the world s information and make it universally accessible and its much quoted motto Don t be evil In this provocative book Siva Vaidhyanathan examines the ways we have used and embraced Google and the growing resistance to its expansion across the globe He exposes the dark side of our Google fantasies raising red flags about issues of intellectual property and the much touted Google Book Search He assesses Google s global impact particularly in China and explains the insidious effect of Googlization on the way we think Finally Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to avoid

The New Patriarchs of Digital Capitalism Ben Little, Alison Winch, 2021-06-23 This book offers an original critique of the billionaire founders of US West Coast tech companies addressing their collective power influence and ideology their group dynamics and the role they play in the wider sociocultural and political formations of digital capitalism Interrogating not only the founders political and economic ambitions but also how their corporations are omnipresent in our everyday lives the authors provide robust evidence that a specific kind of patriarchal power has emerged as digital capitalism s mode of command The New Patriarchs examined over the course of the book include Sergey Brin and Larry Page of Google Elon Musk of Tesla Jeff Bezos of Amazon Mark Zuckerberg of Facebook and Peter Thiel We also include Sheryl Sandberg The book analyses how these mostly men legitimate their rapidly acquired power tying a novel kind of socially awkward but visionary masculinity to exotic forms of shareholding Drawing on a ten million word digital concordance the authors intervene in feminist debates on patriarchy masculinity and postfeminism locating the power of the founders as emanating from a specifically racialised structure of oppression tied to imaginaries of the American frontier the patriarchal household and settler colonialism This is an important interdisciplinary contribution suitable for researchers and students across Digital Media Media and Communication and Gender and Cultural Studies

The People's Platform Astra Taylor, 2014-04-15 An invaluable primer for anyone seeking to understand why our networked world isn't all that it is cracked up to be The Guardian The Internet has been hailed as an unprecedented democratizing force a place where everyone can be heard and all can participate equally But how true is this claim In a seminal dismantling of techno utopian visions The People's Platform argues that for all that we tweet and like and share the Internet in fact reflects and amplifies real world inequities at least as much as it ameliorates them Online just as off line attention and influence largely accrue to those who already have plenty of both What we have seen so far Astra Taylor says has been not a revolution but a rearrangement Although Silicon Valley tycoons have eclipsed Hollywood moguls a handful of giants like Amazon Apple Google and Facebook remain the gatekeepers And the worst habits of the old media model the pressure to seek easy celebrity to be quick and sensational above all have proliferated on the web where aggregating the work of others is the surest way to attract eyeballs and ad revenue When culture is free creative work has diminishing value and advertising fuels the system The new order looks suspiciously like the old one We can do better Taylor insists The online world does offer a unique opportunity but a democratic culture that supports diverse voices and work of lasting value will not spring up from technology alone If we want the Internet to truly be a people's platform we will have to make it so Beautifully written and highly recommended David Byrne musician and author

Antisocial Media Siva Vaidhyanathan, 2018-05-15 A fully updated paperback edition that includes coverage of the key developments of the past two years including the political controversies that swirled around Facebook with increasing intensity in the Trump era If you wanted to build a machine that would distribute propaganda to millions of people distract them from important issues energize hatred and bigotry erode social trust undermine respectable journalism foster doubts about science and engage in massive surveillance all at once you would make something a lot like Facebook Of course none of that was part of the plan In this fully updated paperback edition of *Antisocial Media* including a new chapter on the increasing recognition of and reaction against Facebook's power in the last couple of years Siva Vaidhyanathan explains how Facebook devolved from an innocent social site hacked together by Harvard students into a force that while it may make personal life just a little more pleasurable makes democracy a lot more challenging It's an account of the hubris of good intentions a missionary spirit and an ideology that sees computer code as the universal solvent for all human problems And it's an indictment of how social media has fostered the deterioration of democratic culture around the world from facilitating Russian meddling in support of Trump's election to the exploitation of the platform by murderous authoritarians in Burma and the Philippines Both authoritative and trenchant *Antisocial Media* shows how Facebook's mission went so wrong

Tech Giants, Artificial Intelligence, and the Future of Journalism Jason Paul Whittaker, 2019-02-11 This book examines the impact of the Big Five technology companies Apple Alphabet

Google Amazon Facebook and Microsoft on journalism and the media industries It looks at the current role of algorithms and artificial intelligence in curating how we consume media and their increasing influence on the production of the news Exploring the changes that the technology industry and automation have made in the past decade to the production distribution and consumption of news globally the book considers what happens to journalism once it is produced and enters the media ecosystems of the internet tech giants and the impact of social media and AI on such things as fake news in the post truth age The audience for this book are students and researchers working in the field of digital media and journalism studies or media studies more generally It will also be useful to those who are looking for extended case studies of the role taken by tech giants such as Facebook and Google in the fake news scandal or the role of Jeff Bezos in transforming The Washington Post The Open Access version of this book available at <https://doi.org/10.4324/9781351013758> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Inhuman Networks Grant Bollmer, 2016-08-11 Social media's connectivity is often thought to be a manifestation of human nature buried until now revealed only through the diverse technologies of the participatory internet Rather than embrace this view *Inhuman Networks* Social Media and the Archaeology of Connection argues that the human nature revealed by social media imagines network technology and data as models for behavior online Covering a wide range of historical and interdisciplinary subjects Grant Bollmer examines the emergence of the network as a model for relation in the 1700s and 1800s and follows it through marginal often forgotten articulations of technology biology economics and the social From this history Bollmer examines contemporary controversies surrounding social media extending out to the influence of network models on issues of critical theory politics popular science and neoliberalism By moving through the past and present of network media *Inhuman Networks* demonstrates how contemporary network culture unintentionally repeats debates over the limits of Western modernity to provide an idealized future where the human is interchangeable with abstract flowing data connected through well managed distributed networks

Philosophers in the Technological Age Ulrich Richter Morales, 2023-04-26 Greek philosophers built great discussions about reality which are still current in our times and still inspire today's great thinkers From mathematical teachings by Pythagoras encompassing Plato's and Aristotle's ideas these great discussions have been essential for our present intellectual development Today however this role has been adopted by a new class of visionaries Brought together by this new Platonic Academy based in Stanford University devoted to proving and making use of the supremacy of numbers and mathematics in the digital world intent on finding the new Holy Grail embodied in the perfect algorithm present time's entrepreneurs of new technologies have radically transformed for good or otherwise the world as we know it Ulrich Richter Morales delves deep into the legacy sometimes clear sometimes mystical and esoteric of the Pythagoreans in their diverse historical incarnations He particularly emphasizes their dominant role in these digital times while he introduces a debate regarding the sort of machines we ought to develop Elon Musk Steve Jobs Bill Gates Jeff Bezos

Larry Page and Sergey Brin among others are declared heirs of the Mathematician from Samos and always engrossed in polemic discussions they are inseparable from our concept of how the world works Getting to know them as persons and as thinkers is a way to better understand modern day life and our role as citizens in the unstable volatile grounds we tread on today

Trading Zones of Digital History Max Kemman,2021-10-04 Digital history is commonly argued to be positioned between the traditionally historical and the computational or digital By studying digital history collaborations and the establishment of the Luxembourg Centre for Contemporary and Digital History Kemman examines how digital history will impact historical scholarship His analysis shows that digital history does not occupy a singular position between the digital and the historical Instead historians continuously move across this dimension choosing or finding themselves in different positions as they construct different trading zones through cross disciplinary engagement negotiation of research goals and individual interests

The Black Box Society Frank Pasquale,2015-01-05 Every day corporations are connecting the dots about our personal behavior silently scrutinizing clues left behind by our work habits and Internet use The data compiled and portraits created are incredibly detailed to the point of being invasive But who connects the dots about what firms are doing with this information The Black Box Society argues that we all need to be able to do so and to set limits on how big data affects our lives Hidden algorithms can make or ruin reputations decide the destiny of entrepreneurs or even devastate an entire economy Shrouded in secrecy and complexity decisions at major Silicon Valley and Wall Street firms were long assumed to be neutral and technical But leaks whistleblowers and legal disputes have shed new light on automated judgment Self serving and reckless behavior is surprisingly common and easy to hide in code protected by legal and real secrecy Even after billions of dollars of fines have been levied underfunded regulators may have only scratched the surface of this troubling behavior Frank Pasquale exposes how powerful interests abuse secrecy for profit and explains ways to rein them in Demanding transparency is only the first step An intelligible society would assure that key decisions of its most important firms are fair nondiscriminatory and open to criticism Silicon Valley and Wall Street need to accept as much accountability as they impose on others
