German Annual of Spatial Research and Policy 2010 Bernhard Müller, 2010-11-27 Resilience is increasingly becoming a catchword in current discussions about urban and regional development While there has been a strong research focus on sustainability there is a lack of understanding of the processes and factors that make cities and regions more vulnerable and others more resilient for example when dealing with climate change demographic decline and ageing as well as economic crises The German Annual of Spatial Research and Policy 2010 sheds some light on this by discussing examples of how actors deal with change On the one hand concepts are described and analysed which are oriented towards increasing urban regional resilience for example regarding energy consumption climate change and urban decline Moreover institutional aspects are discussed On the other hand barriers for using the concept of resilience in planning are described and suggestions are made about how to deal with these barriers in strategic planning

Coworking Spaces Janet Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i e self

employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor. Grounded in this perspective, this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice. There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed, more cautionary views prevail, highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies. The aims of this collection are twofold. First, it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non-human actors as agents of change associated with coworking and the reorganization of work and labor power. And second, it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated. A narrative that does not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful, careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change. So it is about alternative narratives, emancipation, politics, and the wider social role that coworking spaces might play in neighborhoods, cities, or beyond because they are crucial contexts for the formation and maintenance of social relations. With this specific direction, this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work, feminist perspectives on care, alternative and diverse economies, post-capitalist transformation, critical geography, positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships.

Urban Ethics Moritz Ege, Johannes Moser, 2020-10-05. This book delves into the ethical dimension of urban life: how should one live in the city? What constitutes a good life under urban conditions? Whose gets to live a good life and whose ideas of morality, propriety, and good prevail? What is the connection between the good and the just in urban life? Rather than philosophizing the good and proper life in cities, the book considers what happens when urban conflicts and urban futures are carried out as conflicts over the good and proper life in cities. It offers an understanding of how ethical discourses, ideals, and values are harmonized with material interests of different groups, taking up case studies about environmental protection, co-housing schemes, political protest, heritage preservation, participatory planning, collaborative art production, and other topics from different eras and parts of the globe. This book offers multidisciplinary insights, ethnographic research, and conceptual tools and resources to explore and better understand such conflicts. It questions the ways in which urban ethics draw on tacit moral economies of urban life and the ways in which such moral economies become explicit, political, and programmatic. Chapters 1 and 11 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) 4.0 license.

Handbook of Management and Creativity Chris Bilton, Stephen Cummings, 2014-01-01. In many organisations

creativity is so often seen as the preserve of a small number of people with artistic temperaments but in my experience all sorts of people have creative abilities which can be used to the benefit of a creative organisation The task of a manager is to find ways of exploiting this This Handbook provides the reader with insights to help them and others to promote the kind of creativity that adds real value Greg Dyke Chair British Film Institute Chair Football Association Chancellor University of York UK and Director General of the BBC 2000 2004 *Handbook of Creative Cities* D. E. Andersson, E. Andersson, Charlotta Mellander, 2011-01-01 With the publication of *The Rise of the Creative Class* by Richard Florida in 2002 the creative city became the new hot topic among urban policymakers planners and economists Florida has developed one of three path breaking theories about the relationship between creative individuals and urban environments The economist ke E Andersson and the psychologist Dean Simonton are the other members of this creative troika In the *Handbook of Creative Cities* Florida Andersson and Simonton appear in the same volume for the first time The expert contributors in this timely Handbook extend their insights with a varied set of theoretical and empirical tools The diversity of the contributions reflect the multidisciplinary nature of creative city theorizing which encompasses urban economics economic geography social psychology urban sociology and urban planning The stated policy implications are equally diverse ranging from libertarian to social democratic visions of our shared creative and urban future Being truly international in its scope this major Handbook will be particularly useful for policy makers that are involved in urban development academics in urban economics economic geography urban sociology social psychology and urban planning as well as graduate and advanced undergraduate students across the social sciences and in business *A Companion to Border Studies* Thomas M. The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Virtual Workers and the Global Labour Market Juliet Webster, Keith Randle, 2016-09-27 The emerging world of virtual work is not tied to physical workplaces or particular locations but is dispersed and footloose It is frequently precarious and blurs the boundaries between work and non work production and consumption Contributors to this wide ranging volume of case studies identify the growing and diverse army of virtual workers Building from an overarching introduction which discusses the salient features of virtual work this collection considers the challenges in analysing the class position of virtual workers Virtual Workers and the Global Labour Market features international examples of emerging occupations and working conditions in new media gaming journalism advertising and branding software development and offshore services Cross disciplinary insights from across the social sciences inform contributions on labour market entry employment relations precariousness the dynamics of virtual teams and cyberbullying in order to illustrate the diversity of

virtual work its circumstances and its labour force **A Modern Guide to the Urban Sharing Economy** Sigler, Thomas, Corcoran, Jonathan, 2021-08-27 Providing a comprehensive overview of the urban sharing economy this Modern Guide takes a forward looking perspective on how sharing goods and services may facilitate future sustainability of consumption and production It highlights recent developments and issues with cutting edge discussions from leading international scholars in business engineering environmental management geography law planning sociology and transport studies **Revitalizing Entrepreneurship Education** Karin Berglund, Karen Verduyn, 2018-01-19 Within mainstream scholarship it is assumed without question that entrepreneurship and entrepreneurship education are desirable and positive economic activities Drawing on a wide range of theoretical approaches and political philosophical perspectives critical entrepreneurship studies has emerged to ask the questions which this assumption obscures Students of entrepreneurship need to understand why and how entrepreneurship is seen as a moral force which can solve social problems or protect the environment or even to tackle political problems It is time to evaluate how such contributions and insights have entered our classrooms How much if any critical discussion and insight enters our classrooms How do we change when students demand to be taught how to do it not to be critical or reflexive If educators are to bring alternative perspectives into the classroom it will entail a new way of thinking There is a need to share ideas and practical approaches and that is what the contributions to this volume aim to do and to illuminate new ways forward in entrepreneurship education
