Governing Ethnic Conflict Governing Ethnic Conflict:

Governing Ethnic Conflict Andrew Finlay, 2010-07-15 This book offers an intellectual history of an emerging technology of peace and explains how the liberal state has come to endorse illiberal subjects and practices The idea that conflicts are problems that have causes and therefore solutions rather than winners and losers has gained momentum since the end of the Cold War and it has become more common for third party mediators acting in the name of liberal internationalism to promote the resolution of intra state conflicts These third party peace makers appear to share lessons and expertise so that it is possible to speak of an emergent common technology of peace based around a controversial form of power sharing known as consociation In this common technology of peace the cause of conflict is understood to be competing ethno national identities and the solution is to recognize these identities and make them useful to government through power sharing Drawing on an analysis of the peace process in Ireland and the Dayton Accords in Bosnia Herzegovina the book argues that the problem with consociational arrangements is not simply that they institutionalise ethnic division and privilege particular identities or groups but more importantly that they close down the space for other ways of being By specifying identity categories consociational regimes create a residual sink category designated other These others not only offer a challenge to prevailing ideas about identity but also stand in reproach to conventional wisdom regarding the management of conflict This book will be of much interest to students of conflict resolution ethnic conflict identity and war and conflict studies in general Andrew Finlay is Lecturer in Sociology at Trinity College Dublin

International Approaches to Governing Ethnic Diversity Jane Boulden, Will Kymlicka, 2015 This book charts new territory by mapping the range of international actors who affect the governance of ethnic diversity and exploring their often contradictory roles and impacts

Revival: Ethnicity and Governance in the Third World (2001) Pita Ogaba Agbese, 2017-07-12 This title was first published in 2001 Written by an outstanding international group of researchers

focusing on ethnic conflict this refreshing analysis provides practical and effective policy options for the people of the Third World Global Governance, Conflict and Resistance F. Cochrane, R. Duffy, J. Selby, 2003-11-27 Since the turn of the millennium resistance to the liberal project of global governance has come to occupy centre stage in global and international politics The Battle of Seattle the 9 11 attacks on New York and Washington and the Bush administration's ambivalent attitude towards multilateralism can all be thought of as conspicuous instances of the growing challenge to global governance Global Governance Conflict and Resistance provides a wide ranging series of analyses of such challenges

Contemporary Issues on Governance, Conflict and Security in Africa Adeoye O. Akinola, 2023-05-25 This edited volume reflects on some of the important discussions on the trends of governance conflict and security in Africa It explores some of the emerging concerns and offers a holistic understanding of the remote and immediate causes of the conflict and how the neo colonial African states have been structured in a manner that makes violent conflict inevitable The book thereby provides an overview of Africa's security challenges and proffers some sustainable policy options for curtailing lawlessness and armed conflict on the continent Literature is exhaustive about the nexus between governance peace and security however discourse on the impact of new conflict on governance has been scant Understanding these new trends has become a necessity and precondition for sustainable development as reflected in both the African Union AU Agenda 2063 and the United Nations UN Sustainable Development Goals SDGs Conflict and Post-Conflict Governance in the Middle East and Africa Moosa A. Elayah, Laurent A. Lambert, 2023-03-12 This book explores the challenges of the governance and public policy in the midst and after conflicts revolutions and civil wars in the Middle East and Africa As anywhere else the task of rebuilding peace and institutionalizing stability in countries experiencing a conflict or just emerging from it is daunting uncertain and context specific Yet focusing on the Middle East and Africa is of particular relevance as these two regions feature the highest numbers of inter and intra state conflicts on the one hand and the central states are more often contested than in the rest of world regions The first half of the book proposes different cases addressing the fundamental challenge of inclusion and cohesion as well as the recurring issue of exclusion in conflict affected situations with four different cultural and institutional settings The second half of the book offers more theoretical insights and proposed pathways to develop more inclusive and peaceful governance settings in Africa the Middle East and beyond This edited book has been designed to be a helpful contribution to the analysis of conflict and post conflict governance and peacebuilding To do so it deploys different lenses of social sciences especially public policy and international relations but also benefits from social psychology political anthropology and other disciplines that enable a more comprehensive understanding of the multifaceted complex and dynamic issues at play *Public Security and Governance in Contemporary China* Mingjun Zhang, Xinye Wu, 2017-09-20 The recent rise in reported public security issues in China is one of the most repeated concerns amongst the Chinese authorities During the past 30 years of reform in China stability maintenance as a governance strategy has in fact laid a solid

foundation for the overall development and growth of the nation. However, it remains to be seen whether this approach can sustain economic growth as well as political stability in the near future. This book examines this policy of stability maintenance as adopted by the Chinese government in different social circumstances. Using a variety of examples including hospital disputes, incidents of environmental pollution, food safety issues, and disaster settlements, it takes a multi-disciplinary approach using empirical data to assess the true picture of contentious politics in China. Although stability maintenance has played a major role in confronting many of the serious challenges posed to China's public security, ultimately the book concludes that as a governance strategy, it can only be short-term and will surely be replaced due to its high costs. Using case studies from across China, this book will be of interest to students and scholars of Chinese Studies, Political Science, and Sociology. It will also appeal to journalists and policy analysts with an interest in Chinese politics and society.

Ethnic Conflict and Governance in Comparative Perspective, 1995 **Policy Choices in Internal Conflicts - Governing Systems and Outcomes** V. R. Raghavan, 2013-01-01

Contributed articles **Toward Better Governance in China** Baogang Guo, Dennis V. Hickey, 2009-11-12

Toward Better Governance in China takes a fresh look at the latest efforts made by Chinese leaders to promote governance-based reform. It asserts that the improvement of governance has now become one of the breakthrough points of the much anticipated political reform. Although the Chinese government continues to play down expectations about political reform, many small-scale reform experiments have been quietly undertaken by Chinese leaders at various levels in recent years, including the new round of administrative reform centered on the creation of super-ministries, the enlargement of inner-party democracy within the Chinese Communist Party (CCP), the strengthening of local legislative bodies, and judicial reform designed to promote judicial independence and rule of law. This strategy calls for strengthening governing capacity and changing government functions. One of the advantages in placing the improvement of governance first is that it is less risky than embarking upon a full-scale electoral reform. Electoral democracy is undoubtedly an important element in a functional democracy. But equally important is the effectiveness, transparency, accountability, and openness of the governing process. Better governance implies greater transparency, open deliberation, and participation, and less adversarial political confrontation and conflict. If constructed properly, China may become the sort of democratic administration or administrative democracy that Robert Dahl discussed in 1947. Clearly, political reform of this kind does not follow the conventional wisdom of a democratic transition, which places heavy emphasis on electoral reform or the precedence of the electoral reform to the government reform. This book is intended to shed some new light on the ongoing debate about the direction of China's political development.

Governance George M. Guess, 2018-07-16 Efforts by governments to promote sustained domestic economic development have been mixed Success depends on many factors including location geography climate external competition human resources natural resources timing political and governmental institutions government capacity implementation leadership values and maybe luck This complexity means that while development experts can often identify ingredients for success few can prescribe the specific mix needed by a particular state to achieve sustained development over the long term In Building Democracy and International Governance author George M Guess uses both case studies and careful data analysis to argue that federalist democracy may just be the most responsive authoritative and flexible system for nation building and that there is value in confronting the challenges that lie in exporting federalist democracy abroad Guess demonstrates the ways in which federation structures provide positive redundancy against failures flexibility to change course and implement programs and policies and state legitimacy and strength Examining twelve wealthy and developing countries from five regions representing democratic and authoritarian government structures confederations and federations this book will be of interest to those teaching graduate and undergraduate courses in Political Development Democratization Federalism and Comparative Political Economy

Facing Ethnic Conflicts Andreas Wimmer, 2004 Ethnic conflict is the major form of mass political violence in the world today and it has been since World War II Dramatic acts of terrorism and calculated responses to them may distract the attention of policymakers and the public but ethnic and nationalist conflict continues to pose the greatest challenge to peace and security across the globe Causes of such conflict and ideas about how to address it are hotly debated in the literature that has emerged over the past fifteen years This volume offers a unique overview of research and policy approaches to ethnic conflicts It is the first book to bring together experienced policymakers and key scholars from all disciplines They debate how to best understand the rise and escalation of ethnic conflict assess different strategies for peacemaking mediation and reconciliation and evaluate the prospects for conflict management through institutional design In contrast with a more enthusiastic assessment of the willingness and capacity to successfully intervene in ethnic conflict this volume documents the new realism that has emerged over the past decade It recognizes the complex and protracted nature of such conflicts and demands a multifaceted case by case approach sustained by long term political engagement Published in co operation with the Center for Development Research University of Bonn

Liberal Peacebuilding and Global Governance David Roberts, 2011-03 This book examines the limits to cosmopolitan liberal peacebuilding caused by its preoccupation with the values and assumptions of neoliberal global governance The peace people experience is determined by the processes privileged in peacebuilding This book is about four things that shape the processes involved First it is a critique of orthodox postconflict peacebuilding It takes the position that the present approach although seemingly hegemonic is routinely ignored or manipulated by elites and society and converted into a miasma that to some degree wastes the energies and opportunities involved Second it is about alternatives which invoke the kind of peace

people might seek in postconflict places if they had more control over the process of peacebuilding a notion referred to here as popular peace It is thus not the kind of critical work that some describe as reflexive anti liberalism Rather it seeks alternatives that are grounded in the lives of people in postconflict spaces and which also reflect some of the essential values of Liberalism Third it is about the role of both informal and formal actors institutions and practices in the creation of such a peace For instance it is concerned with the legitimacy of informal practices that lie beyond Liberal tolerance and which are vital in the pursuit of everyday peace Fourth it is about a transversal rather than vertical or hierarchical relationship of global and local governance in securing a peace that reflects the needs and values of both In short this work is a response to the substantial inconsistencies that appear between peacebuilding rhetoric and everyday outcomes in postconflict places This book will be of much interest to students of peacebuilding post conflict statebuilding conflict studies global governance and International Relations in general
