Advances in Marine Environmental Protection: Challenges, Solutions and Perspectives Mehran Idris Khan, Yen-Chiang Chang, Wen-Hong Liu, 2025-04-29 Environments have no boundaries and no borders Managing oceanic environments particularly the threats and risks of pollution should also consider the shared responsibility of all coastal states Emerging issues for oceanic pollution governance include global changes like rising temperature ocean acidification but also disturbances of ecosystem functioning by plastic and pollution by other emerging contaminants for example noise pollution and deep sea mining These call for efficient and sustainable prevention and restoration strategies such as efficient urban and industrial sewage treatment plants efficiently administered transnational marine protected areas and among others sustainable aquaculture extensive small scale fisheries Environmental protection warrants the development of interrelationships between marine sciences relevant industries and ocean governance developing internationally accepted rules and regulations for sustainable ocean management This Research Topic will explore possible new domains of ocean governance and the marine environment from the interdisciplinary perspectives of the rule of law including the international agreement on equal conventions the Convention on Facilitation of International Maritime Traffic the Convention on the International Regulation for Preventing Collisions at Sea and International Convention for the Prevention of Pollution from Ships MARPOL

Governing Sustainability W. Neil Adger, Andrew Jordan, 2009-02-05 The crisis of unsustainability is above all else a crisis of governance The transition to a more sustainable world will inevitably require radical changes in the actions of all governments and it will call for significant changes to the lifestyles of individuals everywhere Bringing together some of the world's most highly regarded experts on governance and sustainable development this book examines these necessary processes and consequences across a range of sectors regions and other important areas of concern It reveals that the governance of sustainable development is politically contested and that it will continue to test existing governance systems to their limits As an assessment of existing policy practices it will be of great interest to all those who are preparing themselves or their organisations for the sustainability transition

The Blue Compendium Jane Lubchenco, Peter M. Haugan, 2023-05-24 Home to over 80 percent of all life on Earth the ocean is the world's largest carbon sink and a key source of food and economic security for billions of people The relevance of the ocean for humanity's future is undisputed However the ocean's great potential to drive economic growth and equitable job creation sustain healthy ecosystems and mitigate climate change is not yet fully recognised Lack of awareness of this potential as well as management and governance challenges pose impediments Until these impediments are removed ocean ecosystems will continue to be degraded and opportunities for people lost A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed This open access collection of papers and reports identifies a path that is inspired by science energised by engaged people and emboldened by visionary leaders These assessments of knowledge are commissioned by

the High Level Panel for a Sustainable Ocean Economy Ocean Panel which was established in September 2018 as a unique initiative led by heads of state and government from around the world to showcase the latest leading edge science knowledge and state of the art thinking on key ocean issues Altogether The Blue Compendium offers innovative ocean solutions in technology policy governance and finance realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business finance and civil society Governing for Sustainability John C. Dernbach, Scott E Schang, 2023-05-10

Description Coming Soon **Governing Sustainability** Lennart Oestergaard, 2019 **Governance for Sustainability** Klaus Bosselmann, Ron Engel, Prue Taylor, 2008 This report is currently available in an electronic format only To view the report and others published by the International Union for Conservation of Nature IUCN please visit IUCN's website

Governance for sustainability is defined as the set of written and unwritten rules that link ecological citizenship with institutions and norms of governance It is a complex topic because it addresses the three issues of globalization democracy and sustainability No form of governance can succeed if there is no common bond between those who govern and those who are being governed The real issue is whether the common good that is the sustainability of life can be pursued through democratic forms of governance This publication compiles information evaluations and case studies to enable the reader to explore and reflect upon governance for sustainability **Sustainability for the Nation** National Research Council, Policy and Global Affairs, Science and Technology for Sustainability Program, Committee on Sustainability Linkages in the Federal Government, 2013-07-11

A sustainable society according to one definition is one that can persist over generations one that is far seeing enough flexible enough and wise enough not to undermine either its physical or its social system of support As the government sector works hard to ensure sufficient fresh water food energy housing health and education for the nation without limiting resources for the future generations it's clear that there is no sufficient organization to deal with sustainability issues Each federal agency appears to have a single mandate or a single area of expertise making it difficult to tackle issues such as managing the ecosystem Key resource domains which include water land energy and nonrenewable resources for example are nearly completely connected yet different agencies exist to address only one aspect of these domains The legendary ecologist John Muir wrote in 1911 that when we try to pick out anything by itself we find it hitched to everything else in the Universe Thus in order for the nation to be successful in sustaining its resources linkages will need to be built among federal state and local governments nongovernmental organizations NGOs and the private sector The National Research Council NRC was asked by several federal agencies foundations and the private sector to provide guidance to the federal government on issues related to sustainability linkages The NRC assigned the task to a committee with a wide range of expertise in government academia and business The committee held public fact finding meetings to hear

from agencies and stakeholder groups examined sustainability management examples conducted extensive literature reviews and more to address the issue Sustainability for the Nation Resource Connection and Governance Linkages is the committee's report on the issue The report includes insight into high priority areas for governance linkages the challenges of managing connected systems impediments to successful government linkages and more The report also features examples of government linkages which include Adaptive Management on the Platte River Philadelphia's Green Stormwater

Infrastructure and Managing Land Use in the Mojave **Routledge Handbook of Global Sustainability Governance**

Agni Kalfagianni, Doris Fuchs, Anders Hayden, 2019-10-21 The Routledge Handbook of Global Sustainability Governance provides a state of the art review of core debates and contributions that offer a more normative critical and transformatively aspirational view on global sustainability governance In this landmark text an international group of acclaimed scholars provides an overview of key analytical and normative perspectives material and ideational structural barriers to sustainability transformation and transformative strategies Drawing on pivotal new and contemporary research the volume highlights aspects to be considered and blind spots to be avoided when trying to understand and implement global sustainability governance In this context the authors of this book debunk many myths about all too optimistic accounts of progress towards a sustainability transition Simultaneously they suggest approaches that have the potential for real sustainability transformation and systemic change while acknowledging existing hurdles The wide ranging chapters in the collection are organised into four key parts Part 1 Conceptual lenses Part 2 Ethics principles and debates Part 3 Key challenges Part 4 Transformative approaches This handbook will serve as an important resource for academics and practitioners working in the fields of sustainability governance and environmental politics **Crisis of Global Sustainability** Tapio Kanninen, 2013

This concise and informative text provides a critical history of the concept of sustainability and the various institutional measures taken to promote implement and enforce sustainable development proposing new organizational solutions to deal with the crisis of sustainability Crisis of Global Sustainability provides for the first time a compact insider description of the evolution and impact of the Club of Rome a global think tank that produced a groundbreaking 1972 study The Limits to Growth which highlighted the dangers of unrestrained economic growth and possible collapse of global economy during the first decades of the 21st century With recent research confirming the validity of these concerns Kanninen asks whether our overarching concept of thinking on world development today should continue to be global sustainability which implies that we still have enough time to make adjustments in our future policies and action Or should the main paradigm of our thinking shift to global survivability a concept that stresses the absolute necessity of immediate and drastic change both in institutions and policies Many environmentalists green politicians and think tanks are speaking today more loudly than ever about the necessity for a major policy institutional and paradigm change and this work is essential reading for students and scholars alike **Linking Knowledge with Action for Sustainable Development** National Research Council, Policy and Global

Affairs, Science and Technology for Sustainability Program, Roundtable on Science and Technology for Sustainability, 2006-06-18 This report summarizes a workshop organized by the National Academies Roundtable on Science and Technology for Sustainability The workshop brought together a select group of program managers from the public and private sectors to discuss specific cases of linking knowledge to action in a diverse set of integrated observation assessment and decision support systems Workshop discussions explored a wide variety of experiments in harnessing science and technology to goals of promoting development and conserving the environment Participants reflected on the most significant challenges that they have faced when trying to implement their programs and the strategies that they have used to address them successfully The report summarizes discussions at the workshop including common themes about the process of linking knowledge with actions for sustainable development that emerged across a wide range of cases sectors and regions

Acting as If Tomorrow Matters John C. Dernbach, 2012 This is a guide to making the United States environmentally sustainable It explains the progress made to date on sustainability including a description of the most significant obstacles to rapid and increased success Building on the framework that has guided real progress so far the author explains in detail how to make a greater variety of more sustainable decisions even more attractive how law can provide an even better enabling environment for sustainability and how public opinion and leadership can more effectively be engaged to support sustainability

The Local Politics of Global Sustainability Thomas Prugh, Robert Costanza, Herman E. Daly, 1999-12-01 The most difficult questions of sustainability are not about technology they are about values Answers to such questions cannot be found by asking the experts but can only be resolved in the political arena In The Local Politics of Global Sustainability author Thomas Prugh with Robert Costanza and Herman Daly two of the leading thinkers in the field of ecological economics explore the kind of politics that can help enable us to achieve a sustainable world of our choice rather than one imposed by external forces The authors begin by considering the biophysical and economic dimensions of the environmental crisis and tracing the crisis in political discourse and our public lives to its roots They then offer an in depth examination of the elements of a re energized political system that could lead to the development of more sustainable communities Based on a type of self governance that political scientist Benjamin Barber calls strong democracy the politics is one of engagement rather than consignment empowering citizens by directly involving them in community decisionmaking After describing how it should work the authors provide examples of communities that are experimenting with various features of strong democratic systems The Local Politics of Global Sustainability explains in engaging accessible prose the crucial biophysical economic and social issues involved with achieving sustainability It offers a readable exploration of the political implications of ecological economics and will be an essential work for anyone involved in that field as well as for students and scholars in environmental politics and policy and anyone concerned with the theory and practical applications of the concept of sustainable development
