streets of New York the lush and dangerous landscape of Hawaii and the horrors of the Japanese internment camps and the bombing of Hiroshima Shadow Child is set against an epic sweep of history Volcanos tsunamis abandonment racism and war form the urgent unforgettable backdrop of this intimate evocative and deeply moving story of motherhood sisterhood and second chances

Food and War in Mid-Twentieth-Century East Asia Katarzyna J. Cwiertka, 2016-04-15 War has been both an agent of destruction and a catalyst for innovation These two at first sight contradictory yet mutually constitutive outcomes of war waging are particularly pronounced in twentieth century Asia While 1945 marked the beginning of peaceful recovery for Europe military conflicts continued to play a critical role in the historical development of this part of the world In essence all wars in twentieth century Asia stemmed from the political vacuum that developed after the fall of the Japanese Wartime Empire intricately connecting one region with another Yet they have had often very diverse consequences shattering the homes of some and bringing about affluence to others Disarray of war may halt economic activities and render many aspects of life insignificant The need for food however cannot be ignored and the social action that it requires continues in all circumstances This book documents the effects of war on the lives of ordinary people through the investigation of a variety of connections that developed between war waging and the production distribution preparation and consumption of food throughout Asia since the 1930s The topics addressed range from issues at stake at the time of the conflicts such as provisioning the troops and food rationing and food relief for civilians to long term often surprising consequences of war waging and wartime mobilization of resources on the food systems diets and tastes of the societies involved The main argument of this volume is that war has not been a mere disruption but rather a central force in the social and cultural trajectories of twentieth century Asia Due to its close connection with human nourishment and comfort food stands central in the life of the individual On the other hand owing to its connection with profit and power food plays a critical role in the social and economic organization of a society What happens to food and eating is therefore an important index of change a privileged basis for the exploration of historical processes

Weapons of Mass Destruction and the Environment Sipri, 2021-05-30 The effects of weapons of mass destruction cannot be contained either spatially or temporally are unpredictable discriminate poorly between combatants and civilians and are highly disruptive of ecosystems This book first published in 1977 examines several WMD and analyses the extent and duration of environmental damage to be expected from them Chapters are devoted to the ecological impacts of nuclear weapons chemical and biological weapons and geophysical and environmental weapons

Remembering the Cold War David Lowe, Tony Joel, 2014-01-21 Remembering the Cold War examines how more than two decades since the collapse of the Soviet Union Cold War legacies continue to play crucial roles

in defining national identities and shaping international relations around the globe Given the Cold War s blurred definition it has neither a widely accepted commencement date nor unanimous conclusion what is to be remembered This book illustrates that there is in fact a huge body of remembrance and that it is more pertinent to ask what should be included and what can be overlooked Over five sections this richly illustrated volume considers case studies of Cold War remembering from different parts of the world and engages with growing theorisation in the field of memory studies specifically in relation to war David Lowe and Tony Joel afford careful consideration to agencies that identify with being victims of the Cold War In addition the concept of arenas of articulation which envelops the myriad spaces in which the remembering commemorating memorialising and even revising of Cold War history takes place is given prominence **Nuclear Dawn** James P.

Delgado,2011-12-20 At once fascinating and horrific this book details the conception development and impact of the atomic bombs infamously dropped over Hiroshima and Nagasaki in August 1945 The obliteration of Hiroshima and Nagasaki in August 1945 brought the world to a stand still This unimaginable shock confirmed to the world that the race to develop a working atomic weapon during World War II had been won by the American led international effort Horrific and controversial even today these first uses of the atomic bomb had intense ramifications not only on the continued development of the bomb but also on politics and popular culture As well as the technological development historian James Delgado also examines how the US Army Air Force had to develop the capacity to deliver the weapons and examines the sites where development and testing took place in order to give a comprehensive history of the dawning of the nuclear age Army,1955

The Devil Reached Toward the Sky Garrett M. Graff,2025-08-05 A sweeping and comprehensive oral history of the atomic bomb s creation and deployment marking the 80th anniversary of Hiroshima and Nagasaki The Story of World War II Henry Steele Commager,Donald L. Miller,2010-05-11 Drawing on previously unpublished eyewitness accounts prizewinning historian Donald L Miller has written what critics are calling one of the most powerful accounts of warfare ever published Here are the horror and heroism of World War II in the words of the men who fought it the journalists who covered it and the civilians who were caught in its fury Miller gives us an up close deeply personal view of a war that was more savagely fought and whose outcome was in greater doubt than readers might imagine This is the war that Americans at the home front would have read about had they had access to the previously censored testimony of the soldiers on which Miller builds his gripping narrative Miller covers the entire war on land at sea and in the air and provides new coverage of the brutal island fighting in the Pacific the bomber war over Europe the liberation of the death camps and the contributions of African Americans and other minorities He concludes with a suspenseful never before told story of the atomic bombing of Nagasaki based on interviews with the men who flew the mission that ended the war *The Soldiers' Tale* Samuel Hynes,1998-04-01 The Soldiers Tale is the story of modern wars as told by the men who did the actual fighting Hynes examines the journals memoirs and letters of men who fought in the two World Wars and in Vietnam and also the wars fought

against the weak and helpless in concentration camps prisoner of war camps and bombed cities Interweaving his own reflections on war with brilliantly chosen passages from soldiers accounts he offers vivid answers to the question we all ask of men who have fought What was it like In these powerful pages the experiences of modern war which seem unimaginable to those who weren't there become comprehensible and real The wide range of writers examined includes both famous literary memoirists like Robert Graves Tim O'Brien and Elie Wiesel and unknown soldiers who wrote only their war stories Using these testimonies Hynes considers each war in terms of its special circumstances and its effects on men who fought His understanding of the psychology of warfare and of each war's role in history gives this study its intellectual authority the voices of the men who were there and wrote about what they saw and felt give it its powerful dramatic impact **Daikon**

Samuel Hawley, 2025-07-08 A sweeping and suspenseful novel of love and war set in Japan during the final days of World War II with a shocking historical premise three atomic bombs were actually delivered to the Pacific not two and when one of them falls into the hands of the Japanese the fate of a couple that has been separated from one another becomes entangled with the fate of this strange new device Humanism in Surgery Jonathan McFarland, Susana Magalhaes, Jacek Mostwin, René Genadry, 2025-08-12

Medical Humanities and Narrative Medicine have been increasingly relevant in view of the challenges that new health technologies and the digital world pose to truly person-centered healthcare By Narrative Medicine we understand the practice of healthcare with narrative skills that allow professionals to recognize the suffering of others and of themselves be able to interpret verbal and non-verbal narratives of illness and be motivated to act in a way that respects the Person of the Patient and of the Professional Surgery like other medical specialties requires space for reflection and debate on the meaning of humanism and its impact on the quality of care This requirement is more pressing in this area because it has escaped inquiry by Medical Humanities and Narrative Medicine We believe that this is due to the nature of the surgical activity carried out in an enclosed place characterized by the use of sophisticated technologies including robotics and artificial intelligence and inaccessible to patients' relatives In addition the patients' own expectations about surgery reinforce the technological and highly specialized nature of this area often marked by the neglect of the relational context with clear prejudice to the parties involved and the activity itself Although this gap has been identified there has been no space for reflection on the humanization of care in surgery This book is therefore innovative precisely because it responds to the previously mentioned shortcomings offering its readers the opportunity to reflect on Humanism in Surgery
