**Medieval French Literary Culture Abroad** Jane Gilbert, Simon Gaunt, William Burgwinkle, 2020-02-27 The monograph series Oxford Studies in Medieval Literature and Culture showcases the plurilingual and multicultural quality of medieval literature and actively seeks to promote research that not only focuses on the array of subjects medievalists now pursue in literature theology and philosophy in social political jurisprudential and intellectual history the history of art and the history of science but also that combines these subjects productively It offers innovative studies on topics that may include but are not limited to manuscript and book history languages and literatures of the global Middle Ages race and the post colonial the digital humanities media and performance music medicine the history of affect and the emotions the literature and practices of devotion the theory and history of gender and sexuality ecocriticism and the environment theories of aesthetics medievalism The field of medieval francophone literary culture outside France was for many years a minor and peripheral sub field of medieval French literary studies or in the case of Anglo Norman or English studies The past two decades however have seen a major reassessment of the use of French in England in the Low Countries in Italy and in the eastern Mediterranean and this impacts significantly upon the history of literature in French more generally This book is the first to look at the question overall rather than just at one region It also takes a more sustained theorised approach than other studies drawing particularly on Derrida and on Actor Network Theory It discusses a wide range of texts some of which have hitherto been regarded as marginal to French literary history and makes the case for this material being more central to the literary history of French than was allowed in more traditional approaches focused narrowly on France Many of the arguments in Medieval French Literary Culture Abroad are grounded in readings of texts in manuscript rather than in modern critical editions and sustained attention is paid throughout to manuscripts that were produced or travelled outside the kingdom of France
