International Handbook of Research in History, Philosophy and Science Teaching Michael R. Matthews,2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced

guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia

**Double Helix History** Jerome De Groot, 2022-08-29 Double Helix History examines the interface between genetics and history in order to investigate the plausibility of new knowledge derived from scientific methods and to reflect upon what it might mean for the practice of history Since the mapping of the human genome in 2001 there has been an expansion in the use of genetic information for historical investigation Geneticists are confident that this has changed the way we know the past This book considers the practicalities and implications of this seemingly new way of understanding the human past using genetics It provides the first sustained engagement with these so called genomic histories The book investigates the ways that genetic awareness and practice is seemingly changing historical practice and conceptualisation Linking six concepts Public Practice Ethics Politics Self and Imagination Double Helix History outlines the ways that genetic information being postgenomic the public life of DNA and the genetic historical imaginary work on the body on collective memory on the historical imagination on the ethics of historical investigation on the articulation of history and on the collection and interpretation of data regarding the past This book will appeal to researchers and students alike interested in DNA genetics and historiography

Gridded Worlds: An Urban Anthology Reuben Rose-Redwood, Liora Bigon, 2018-05-02 This book is the first edited collection to bring together classic and contemporary writings on the urban grid in a single volume The contributions showcased in this book examine the spatial histories of the grid from multiple perspectives in a variety of urban contexts They explore the grid as both an indigenous urban form and a colonial imposition a symbol of Confucian ideals and a spatial manifestation of the Protestant ethic a replicable model for real estate speculation within capitalist societies and a spatial framework for the design of socialist cities By examining the entangled histories of the grid

Gridded Worlds considers the variegated associations of gridded urban space with different political ideologies economic systems and cosmological orientations in comparative historical perspective In doing so this interdisciplinary anthology seeks to inspire new avenues of research on the past present and future of the gridded worlds of urban life Gridded Worlds is primarily tailored to scholars working in the fields of urban history world history urban historical geography architectural history urban design and the history of urban planning and it will also be of interest to art historians area studies scholars and the urban studies community more generally Medical Management of Eating Disorders C. Laird Birmingham, Janet Treasure, 2010-02-25 Now in its second edition this established text provides the practical information needed to treat patients with anorexia nervosa and related eating disorders It is suitable for all health care professionals involved in eating disorder management with special information provided for general practitioners nurses family carers and nutritionists

*The Oxford Illustrated History of the Book* James Raven, 2020-07-31 In 14 original essays The Oxford Illustrated History of the Book reveals the history of books in all their various forms from the ancient world to the digital present Leading international scholars offer an original and richly illustrated narrative that is global in scope The history of the book is the history of millions of written printed and illustrated texts their manufacture distribution and reception Here are different types of production from clay tablets to scrolls from inscribed codices to printed books pamphlets magazines and newspapers from written parchment to digital texts The history of the book is a history of different methods of circulation and dissemination all dependent on innovations in transport from coastal and transoceanic shipping to roads trains planes and the internet It is a history of different modes of reading and reception from learned debate and individual study to public instruction and entertainment It is a history of manufacture craftsmanship dissemination reading and debate Yet the history of books is not simply a question of material form nor indeed of the history of reading and reception The larger question is of the effect of textual production distribution and reception of how books themselves made history To this end each chapter of this volume succinctly bounded by period and geography offers incisive and stimulating insights into the relationship between books and the story of their times Teaching Big History Richard B. Simon, 2014-12-23 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a

general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike
