Item Generation for Test Development Sidney H. Irvine, Patrick C. Kyllonen, 2013-05-13 Since the mid 80s several laboratories around the world have been developing techniques for the operational use of tests derived from item generation. According to the experts the major thrust of test development in the next decade will be the harnessing of item generation technology to the production of computer developed tests. This is expected to revolutionize the way in which tests are constructed and delivered. This book is a compilation of the papers presented at a symposium held at ETS in Princeton attended by the world's foremost experts in item generation theory and practice. Its goal is to present the major applications of cognitive principles in the construction of ability aptitude and achievement tests. It is an intellectual contribution to test development that is unique with great potential for changing the ways tests are generated. The intended market includes professional educators and psychologists interested in test generation.

Advanced Methods in Automatic Item Generation Mark J. Gierl, Hollis Lai, Vasily Tanygin, 2021-05-18 Advanced Methods in Automatic Item Generation is an up to date survey of the growing research on automatic item generation (AIG) in today's technology enhanced educational measurement sector. As test administration procedures increasingly integrate digital media and Internet use assessment stakeholders from graduate students to scholars to industry professionals have numerous opportunities to study and create different types of tests and test items. This comprehensive analysis offers thorough coverage of the theoretical foundations and concepts that define AIG as well as the practical considerations required to produce and apply large numbers of useful test items.

Aviation Mental Health Todd Hubbard, Robert Bor, 2016-04-15 This book provides an authoritative and practical guide to the assessment, management, treatment and care of pilots and other professional groups within aviation covering a range of relevant topics for health and human resources practitioners working in the airline industry. Pilot mental health has hitherto been regarded as a specialist topic in aviation medicine. Consequently practitioners and researchers alike have been forced to consult specialist journals or seek out a relevant chapter on this topic in a general textbook to develop or update their understanding of the relevant issues. This book seeks to remedy this situation by gathering together all of the relevant insights into a single authoritative source gathered from the leading specialists in the field. It aims to cover all of the main relevant issues including the assessment, care, management and treatment of mental health problems as well as the prevention of mental health problems among this occupational group.

Computerised Test Generation for Cross-National Military Recruitment S.H. Irvine, 2014-03-03 Computerised Test Generation for Cross National Military Recruitment by Prof Sidney H Irvine is a handbook for use in occupational psychology test construction and psychometrics. The book describes the development of the British Army Recruitment Battery (BARB) by Prof Irvine and his colleagues at the University of Plymouth. BARB is a computer administered selection battery that is still in use to this day and is capable of developing new parallel tests for every candidate in the recruitment process. In telling the story Sidney Irvine describes not

only the development of the battery itself funded by the UK Ministry of Defence but all the work that went on before and afterwards in the United Kingdom with European allies and in the United States _x000D_ Prof Irvine argues that judicious application of the current state of the art in psychometric selection tests can be used to maximise retention and minimise attrition As such this long awaited book will be of great interest to psychologists psychometricians test developers those involved in personnel selection and all with an interest in military history in particular the history of military science With a foreword and chapter introductions from a worldwide array of subject matter experts the book also has a full subject index and an extensive bibliography I commend it heartily Professor Jamie Hacker Hughes CPsychol CSci FBPsS Former Defence Consultant Advisor in Psychology Ministry of Defence United Kingdom **American Book Publishing Record** ,2002

International Histories of Psychological Assessment Sumaya Laher,2022-08-11 To look forward it is necessary to look back and learn History is more than just facts about the past it is a narrative told from a particular perspective A proverb from Africa Until lions have their own historians tales of the hunt shall always glorify the hunter captures this best Most of the scholarship about psychological assessment comes from very specific nationalities and cultures which does not truly reflect the diversity and breadth of histories pertaining to the field Covering 50 countries this collection gives voice to those that have previously been under represented and sometimes marginalized This book not only describes important moments in psychological assessment from around the globe but also equips readers with the tools to map the future of psychological assessment across nations It advocates for a more globally inclusive science of assessment that holds promise for enhancing creativity and innovation in the field **Classroom Assessment** W. James Popham,2005 I have an extremely high opinion of this textbook This is the only assessment text I have ever used that students actually read consistently Students frequently comment about their enjoyment of the text and their appreciation for the humor injected throughout the chapters Marcy Blackburn Cameron University The topics are presented very clearly are very well organized and are sufficiently comprehensive for pre service teachers Brian C McKeivitt Iowa State University Written in Jim Popham s characteristic witty style the Fourth Edition of Classroom Assessment addresses the range of assessments that teachers are likely to use in their classrooms The forces of accountability have changed educational assessment and this new edition now addresses the central issue of how classroom assessment can effectively benefit students when carried out in the context of accountability tests New legislation such as the No Child Left Behind Act NCLB and issues such as state standards that directly impact classroom testing and teaching are discussed to present readers with a series of practical action options In addition the text continues to analyze more traditional topics such as validity and reliability and discusses the alternative assessments used in today s classrooms MyLabSchool Discover where the classroom comes to life MyLabSchool gives you powerful insights into how real classrooms work From video clips of teachers and students interacting to sample lessons portfolio templates and standards integration we give you the tools you ll need to succeed in the classroom MyLabSchool is
