Questions on the Soul by John Buridan and Others Gyula Klima, 2017-03-30 This volume features essays that explore the insights of the 14th century Parisian nominalist philosopher John Buridan It serves as a companion to the Latin text edition and annotated English translation of his question commentary on Aristotle s On the Soul The contributors survey Buridan s work both in its own historical theoretical context and in relation to contemporary issues The essays come in three main sections which correspond to the three books of Buridan s Questions Coverage first deals with the classification of the science of the soul within the system of Aristotelian sciences and surveys the main issues within it The next section examines

the metaphysics of the soul It considers Buridan s peculiar version of Aristotelian hylomorphism in dealing with the problem of what kind of entity the soul in particular the human soul is and what powers and actions it has on the basis of which we can approach the question of its essence The volume concludes with a look at Buridan s doctrine of the nature and functions of the human intellect Coverage in this section includes the problem of self knowledge in Buridan s theory Buridan s answer to the traditional medieval problem concerning the primary object of the intellect and his unique treatment of logical problems in psychological contexts
