The earliest water pumps had been developed by the eighteenth century basic manual pumps that had to be hauled around by people or horses and were often only used on fire insured premises. In the nineteenth and twentieth centuries horse drawn steam powered fire engines and eventually motorised fire engines came to revolutionise firefighting offering far greater versatility and the brigades came to be run by the municipalities. In this beautifully illustrated introduction Eddie Baker charts the history of fire engines and their variants and the increasingly complex equipment they have carried such as high rise ladders and high pressure hoses. He also explains the wider history of the fire service and how the engines have been shaped by its needs and most importantly those of the firefighters themselves. *Alforja* ,2006-02-28 Un completo análisis de los sectores de la distribución y producción de gran consumo.
