Jagdpanther Vs Su 100 Eastern Front 1945 Duel:

Jagdpanther vs SU-100 David R. Higgins, 2014-04-20 Featuring specially commissioned full colour artwork this engaging study casts new light on the background and details of this clash between two turretless tank destroyers as the two sides contested Hungary's vital oil resources in March 1945 As World War II in Europe reached its end armour development and doctrine had experienced several years of massively accelerated change especially within the crucible of the Eastern Front The German Jagdpanther and Soviet SU 100 both turretless tank destroyer designs based on a traditional turret tank chassis were the culminating examples of how the progression of experience resources and time constraints produced vehicles that were well suited for roles of defence and offence respectively As this compact book details the Jagdpanther represented a well balanced solution and an excellent use of limited resources while the SU 100 was a natural progression of the SU 85 where numbers produced compensated for rudimentary construction poor crew comfort and limited optics

Soviet Tanks in Manchuria 1945 William E. Hiestand, 2023-03-16 A new illustrated study of the devastating but little known Soviet armored blitzkrieg against the Japanese in the last weeks of World War II and how it influenced Soviet tank doctrine as the Cold War dawned Although long overshadowed in the West by the dropping of the atomic bombs on Hiroshima and Nagasaki the USSR's lightning strike into Manchuria in August 1945 was one of the most successful and unique campaigns of the era Soviet forces led by over 5 500 tanks and self propelled guns attacked across huge distances and deserts marshes and mountains to smash Japan's million strong Kwantung Army in a matter of days Japanese forces were short of training and equipment but nevertheless fought fiercely inflicting 32 000 casualties on the Soviets Red Army operations were characterized by surprise speed and deep penetrations by tank heavy forces born of the brutal lessons they had learned during years fighting the Wehrmacht Lessons from the campaign directly shaped Soviet Cold War force structure and planning for mechanized operations against the West Illustrated with contemporary artwork and rare photos from one of the best collections of Soviet military photos in the West this fascinating book explains exactly how the last blitzkrieg of World War II was planned fought and won and how it influenced the Red Army's plans for tank warfare against NATO in Europe

Panther Stephen Andrew, 2018 Jagdpanther Tank Destroyer Dennis Oliver, 2017-11-30 First class illustration and a very effective text overview covers the development on the Panther chassis of a very effective tank destroyer Firetrench Combining the destructive firepower of the 88mm gun with the outstanding mobility of the Panther series the Jagdpanther is quite probably the best known tank destroyer of the Second World War In the vehicle's first action on 30 July 1944 three Jagdpanthers managed to destroy eleven British tanks in a vicious two minute fire fight near the village of Les Loges in

Normandy cementing the Jagdpanther's reputation as a potent tank killer In his fifth book in the TankCraft series Dennis Oliver uses contemporary photographs and meticulously researched superbly presented color and monochrome illustrations to tell the story of these heavy self propelled antitank guns and the units which operated them in the German defense of the Western Front As with all the books in the TankCraft series a large part of this work showcases available model kits and aftermarket products complemented by a gallery of expertly constructed and painted models Technical details as well as modifications introduced during production and in the field are also explained giving the modeler all the information and knowledge required Really interesting concept to combine historical technical and modeling content in one book Nicely illustrated As a first Jagdpanther book for modelers seeking an economical source on models accessories and paint schemes this is valuable Highly Recommended for Beginner to Intermediate builders AMPS *King Tiger vs IS-2* David R. Higgins, 2011-09-20 This book examines the technology and strategy that defined the outcome of the battles between the King Tiger and the IS 2 The Soviets had been quick to develop tanks that could fight the Tiger on an equal footing but these were developed as part of a completely different strategy than that employed by the Germans The King Tiger was a modern marvel and remained unmatched in one on one combat Technologically superior with greater firepower and better armour than the Soviet IS 2 the King Tiger was a formidable opponent However the IS 2 was lighter more manoeuvrable and most importantly far more numerous As well as analysing how different designs and technology helped and hindered each tank this book also discusses how these weapons affected and shaped the overall strategy of the German and Soviet forces Ultimately with overwhelming numerical superiority the Soviets were able to simply overwhelm their opponents negating the technical superiority of the King Tiger *Armour Battles on the Eastern Front: V. 2* Robert Michulec, 1999-03

Jagdpanther Lukasz Gladysiak, Adam Rejmak, 2014-01-19 Self propelled tank destroyers constituted an essential component of the Third Reich's armored arm Vehicles which were especially useful in defensive warfare in which the German army found itself after losing strategic initiative on the Eastern Front in the summer 1943 and following the Allied landing in Italy and France with time began to effectively compete in armored sub units with classic tanks One of the largest vehicles of that type was Jagdpanther Sd Kfz 173 based on the chassis of the famous Panther tank **SU-152/ISU-152 Vs Tiger** David Greentree, 2022
