Conservation Drones Serge A. Wich, Lian Pin Koh, 2018-05-31 Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up to date data on the distribution and density of species as well as the threats to their habitats in their ongoing attempts to conserve and monitor biodiversity Conservation drones are low cost autonomous and operator friendly unmanned aerial vehicles that can be used for surveying mapping and monitoring both habitat and biodiversity They are fast becoming a valuable complement to ground based surveys and satellite imagery for a wide range of ecological and conservation applications The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation

Green,2020-07-10 Unmanned Aircraft Systems UAS are a rapidly evolving technology with an expanding array of diverse applications In response to the continuing evolution of this technology this book discusses unmanned aerial vehicles UAVs and similar systems platforms and sensors as well as exploring some of their environmental applications It explains how they can be used for mapping monitoring and modeling a wide variety of different environmental aspects and at the same time addresses some of the current constraints placed on realizing the potential use of the technology such as s flight duration and distance safety and the invasion of privacy etc Features of the book Provides necessary theoretical foundations for pertinent subject matter areas Introduces the role and value of UAVs for geographical data acquisition and the ways to acquire and process the data Provides a synthesis of ongoing research and a focus on the use of technology for small scale image and spatial data acquisition in an environmental context Written by experts of the technology who bring together UAS tools and resources for the environmental specialist Unmanned Aerial Remote Sensing UAS for Environmental Applications is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications such as conservation research and planning Students and academics in information science environment and natural resources geosciences and geography will likewise find this comprehensive book a useful and informative resource

Karst Groundwater Contamination and Public Health William B. White,Janet S. Herman,Ellen K. Herman,Marian Rutigliano,2017-09-06 This book sheds new light on contaminant transport in karst aquifers and the public health implications of contaminated karst groundwater The papers included were presented at a conference held in early 2016 in San Juan Puerto Rico and range from lengthy reviews on contaminant transport mechanisms to short articles summarizing research findings The conference addressed a variety of topics such as contamination sources the hydrogeology of contaminant transport the storage and release of contaminants and the health impacts as well as the epidemiology of

contaminated water supplies drawn from karst aquifers and gathered perspectives from experts in different disciplines including hydrogeologists and public health specialists Although there is a wealth of literature on specific instances of karst groundwater contamination this book offers an integrated conceptual framework for the public health impacts of karst groundwater making it a valuable resource for a broad interdisciplinary readership
