Louis C. Wassenhoven, 2025-09-01 This book is based on research carried out by the author in Greece addressed initially to Greek readers mainly researchers of the Department of Urban and Regional Planning National Technical University of Athens where he served for a long time as professor However a great deal of the research has a definite international interest and its results form the backbone of his new undertaking in English Although some of the observations included in the initial project are reproduced here the gist of the author's arguments dwells on issues which are not of a narrow national interest This book interests students and historians of town planning whose area of reference is not only Europe but also the countries which have been through a state of dependence and external domination and had to import foreign planning ideas and concepts The author tries to embrace a broad spectrum of urban planning ideas developments and influences which dominated the 19th century planning practice of a country which had just achieved political independence but was still practically a protectorate of the great powers of the time often referred to as the Protecting Powers Great Britain France and Russia Every aspect of domestic policies and developments was directly dictated or indirectly influenced by the choices policies laws and actions of these external forces It was also influenced by the advice and expert opinions of foreigners or even of Greeks whose mode of conceptualizing the problems of the dependent country had been deeply affected by their life or education in foreign lands Looking at this state of affairs more than two centuries after the 1821 Greek War of Independence demands full awareness of these conditions **Histoire de l'urbanisme: Antiquité. Lavedan, 1926 **How Paris Became Paris** Joan DeJean, 2015-04-07 Documents the century long transformation of Paris from a medieval center to the modern city that is recognized today revealing how the Parisian urban model was actually invented in the 1700s when period leaders tore down fortifications created public parks and constructed streets and bridges 25 000 first printing *Urban World History* Luc-Normand Tellier, 2009 No detailed description available for Urban World History

Aspects of Louisbourg Eric Krause, Carol Corbin, William A. O'Shea, 1995 Aspects of Louisbourg is an eclectic collection of essays that considers the economic social military and commemorative events in the lives of the people of Louisbourg From the rugged life of an 18th century fishing family to gardens and material culture to today's commemorative activities these essays paint a picture of the life of Louisbourg **Futures & Ruins** Nina L. Dubin, Hubert Robert, 2010 In

this timely and provocative study Hubert Robert's paintings of urban ruins are interpreted as manifestations of a new consciousness of time one shaped by the uncertainties of an economy characterized by the dread inducing expansion of credit frenzied speculation on the stock exchange and bold ventures in real estate As the favored artist of an enterprising

Parisian elite Robert is a prophetic case study of the intersections between aesthetics and modernity's dawning business culture. At the center of this lively narrative lie Robert's depictions of the ruins of Paris: macabre and spectacular paintings of fires and demolitions created on the eve of the French Revolution. Drawing on a vast range of materials, *Futures Ruins* understands these artworks as harbingers of a modern appetite for destruction. The paintings are examined as expressions of the pleasures and perils of a risk economy. This captivating account, lavishly illustrated with rarely reproduced objects, recovers the critical significance of the eighteenth-century cult of ruins and of Robert's art for our times. **Asia in the**

Making of Europe, Volume II Donald F. Lach, 2010-01-15 Praised for its scope and depth, *Asia in the Making of Europe* is the first comprehensive study of Asian influences on Western culture. For volumes I and II, the author has sifted through virtually every European reference to Asia published in the sixteenth century; he surveys a vast array of writings describing Asian life and society, the images of Asia that emerge from those writings, and in turn the reflections of those images in European literature and art. This monumental achievement reveals profound and pervasive influences of Asian societies on developing Western culture. In doing so, it provides a perspective necessary for a balanced view of world history. Volume I, *The Century of Discovery*, brings together everything that a European could know of India, Southeast Asia, China, and Japan from printed books, missionary reports, traders' accounts, and maps. The *New York Review of Books*, Volume II, *A Century of Wonder*, examines the influence of that vast new body of information about Asia on the arts, institutions, literatures, and ideas of sixteenth-century Europe. **Cities & the Sea** Josef W. Konvitz, 2020-03-24 Originally published in 1978, Josef Konvitz

provides a broad comparative study of European port cities since the Renaissance by examining how they were built and rebuilt in the context of urban industrialization. Konvitz argues that as seafaring became more critical to Western civilization, intellectuals and rulers placed more importance on urban planning. Planning looked different, of course, in various European cities. In Paris, riverside planning was patched into the existing frame of the city, whereas Scandinavian towns on the Baltic were overdesigned to accommodate a degree of maritime trade unsustainable for cities writ large. In the eighteenth century, city planning fell out of vogue, and new solutions were introduced to help solve the problems created by urban development. With a series of helpful maps, Konvitz's book is an important source for urban historians of early modern Europe.

Machines as the Measure of Men Michael Adas, 2015-06-04 Over the past five centuries, advances in Western understanding of and control over the material world have strongly influenced European responses to non-Western peoples and cultures. In *Machines as the Measure of Men*, Michael Adas explores the ways in which European perceptions of their scientific and technological superiority shaped their interactions with people overseas. Adopting a broad comparative perspective, he analyzes European responses to the cultures of sub-Saharan Africa, India, and China—cultures that they judged to represent lower levels of material mastery and social organization. Beginning with the early decades of overseas expansion in the sixteenth century, Adas traces the impact of scientific and technological advances on European attitudes toward Asians.

and Africans and on their policies for dealing with colonized societies He concentrates on British and French thinking in the nineteenth century when he maintains scientific and technological measures of human worth played a critical role in shaping arguments for the notion of racial supremacy and the civilizing mission ideology which were used to justify Europe's domination of the globe Finally he examines the reasons why many Europeans grew dissatisfied with and even rejected this gauge of human worth after World War I and explains why it has remained important to Americans Showing how the scientific and industrial revolutions contributed to the development of European imperialist ideologies *Machines as the Measure of Men* highlights the cultural factors that have nurtured disdain for non Western accomplishments and value systems It also indicates how these attitudes in shaping policies that restricted the diffusion of scientific knowledge have perpetuated themselves and contributed significantly to chronic underdevelopment throughout the developing world Adas's far reaching and provocative book will be compelling reading for all who are concerned about the history of Western imperialism and its legacies First published to wide acclaim in 1989 *Machines as the Measure of Men* is now available in a new edition that features a preface by the author that discusses how subsequent developments in gender and race studies as well as global technology and politics enter into conversation with his original arguments *Cruelty and Utopia*

Reading the Royal Monument in Eighteenth-Century Europe Charlotte Chastel-Rousseau, 2017-07-05 *Reading the Royal Monument in Eighteenth Century Europe* is the first in depth study of the major role played by royal monuments in the public space of expanding cities across eighteenth century Europe Using the royal public statues as the basis for its examination of modern European cities the book considers the development of urban landscapes from the creation of capital cities to the last embers of the Ancien Régime and at how the royal politics of the arts affected the cityscapes of the time The focus of the book thereby intersects across a spectrum of disciplines including the social and architectural history of cities the politics of urban
