Martell, Kaylene M. Stevens, 2021 Learn how to enact justice oriented pedagogy and foster students critical engagement in today's history classroom Over the past 2 decades various scholars have rightfully argued that we need to teach students to think like a historian or think like a democratic citizen In this book the authors advocate for cultivating activist thinking in the history classroom Teachers can use Teaching History for Justice to show students how activism was used in the past to seek justice how past social movements connect to the present and how democratic tools can be used to change society The first section examines the theoretical and research foundation for thinking like an activist and outlines three related pedagogical concepts social inquiry critical multiculturalism and transformative democratic citizenship The second section presents vignettes based on the authors studies of elementary middle and high school history teachers who engage in justice oriented teaching practices Book Features Outlines key components of justice oriented history pedagogy for the history and social studies K 12 classroom Advocates for students to develop thinking like an activist in their approach to

studying the past Contains research based vignettes of four imagined teachers providing examples of what teaching history for justice can look like in practice Includes descriptions of typical units of study in the discipline of history and how they can be reimagined to help students learn about movements and social change Bridging Theory and Practice in Teacher Education ,2007-01-01 This book addresses both the concerns of teacher candidates and their misconceptions about the relation of theory and practice in education The contributors to this volume share the belief that theories provide teachers with a frame of reference and a language with which to name and critically analyze many of the problems they face daily The significance of theory is in its ability to define the problems that teachers face clarify their confusions and suggest possible solutions to these problems Once educational theories are viewed as guides to thought and instruments of interpretation rather than as established facts it becomes clear that they cannot simply be plugged into a particular classroom Instead a theory must be applied in more nuanced and contextual ways taking into account the social historical context in which it was created as well as the various particulars of each classroom situation Experienced educators and scholars in the field have been recruited to write essays that speak to the relevance of different theories in philosophy psychology sociology English history science art technology and multiculturalism for the practice of teaching This book would appeal to teacher educators teacher candidates and teachers in general The New World History Ross E.
