

# History of pi ( $\pi$ )

Pi is a very old number. We know that the Egyptians and the Babylonians knew about the existence of the constant ratio pi, although they didn't know its value nearly as well as we do today. They had figured out that it was a little bigger than 3; the Babylonians had an approximation of  $3\frac{1}{8}$  (3.125), and the Egyptians had a somewhat worse approximation of  $4 \cdot (8/9)^2$  (about 3.160484), which is slightly less accurate and much harder to work with.
