Infinity, Faith, and Time John Spencer Hill, 1997-11-26 In Part 1 Hill examines the effect of the idea of spatial infinity on seventeenth century literature arguing that the metaphysical cosmology of Nicholas of Cusa provided Renaissance writers such as Pascal Traherne and Milton with a way to construe the vastness of space as the symbol of human spiritual potential Focusing on time in Part 2 Hill reveals that faced with the inexorability of time Christian humanists turned to St Augustine to develop a philosophy that interpreted temporal passage as the necessary condition of experience without making it the essence or ultimate measure of human purpose Hill s analysis centres on Shakespeare whose experiments with the shapes of time comprise a gallery of heuristic time centred fictions that attempt to explain the consequences of human existence in time *Infinity Faith and Time* reveals that the sixteenth and seventeenth centuries were a period during which individuals were able with more success than in later times to make room for new ideas without rejecting old beliefs
