focus on masculine desire The work of Stanley Kubrick amounts to a sustained reflection on the male condition past present
and future The persistent theme of his filmmaking is less violence or sex than it is the pressurized exertion of masculinity in
unusual or extreme circumstances where it may be taxed or exaggerated to various effects tragic and comic or
metamorphosed distorted and even undone The stories that Kubrick s movies tell range from global nuclear politics to the
unpredictable sexual dynamics of a marriage from a day in the life of a New York City prizefighter preparing for a nighttime
bout to the evolution of humankind These male melodramas center on sociality and asociality They feature male doubles
pairs and rivals They explore the romance of men and their machines and men as machines They figure intensely conflicted
forms of male sexual desire And they are also very much about male manners style taste and art Examining the formal
thematic and theoretical affiliations between Kubrick s three bodies of work his photographs his documentaries and his
