This annotated document collection surveys the history and evolution of laws and attitudes regarding free speech and censorship in the United States with a special emphasis on contemporary events and controversies related to the First Amendment. The United States collective understanding of First Amendment freedoms was formed by more than 200 years of tensions between the power of word and the power of the government. During that time major laws and legal decisions defined the circumstances and degree to which personal expression could be rightfully expressed and rightfully limited. This struggle to define the parameters of free speech continues today. Vibrant and passionate debates about First Amendment limitations once inspired by the dissemination of birth control information now address such issues as kneeling during the national anthem, removing controversial books from public libraries, attempts by the Trump administration to discredit the press and disseminating false or hateful information through social media platforms. By exploring diverse examples of censorship victories and triumphs of free expression, readers will better understand the enormous impact of First Amendment freedoms on American society.

Censorship! ...or

Selection? Shaheen Shariff, Leanne Johnny, 2007-01-01 This book is a must-read for academics, policy makers, and teachers who grapple with policy and pedagogical decisions about what to include or exclude in schools that cater to diverse stakeholders. Much has been written about controversial litigious school censorship controversies relating to text and library books. Post-September 11th, these have expanded to banning of religious clothing and symbols. Court challenges emerge in the context of a global and political media backdrop that consistently reinforces anti-Muslim sentiment. The re-emergence of an extreme right-wing religious backlash against liberal civil liberties that endorse homosexuality, feminism, religious and racial equality create formidable dilemmas for educators, further complicated by the blurred boundaries of free expression, safety, and privacy in cyberspace as students increasingly communicate online. Shariff and Johnny argue that censorship is deeply rooted in hegemonic perspectives that sustain neo-colonial privilege and silence the social, historical, and intellectual contributions of some students. This curriculum of orthodoxy supports discriminatory political media stereotypes of non-Caucasian ethnic groups through selection that is in fact censorship. The authors introduce a Critical Legal Literacy model for teacher education that combines legal and digital literacies with critical educational pedagogy to help educators meet contemporary challenges through pluralistic ethical and educational decisions.
