The Strictures of

Inheritance Jan Luiten van Zanden,Arthur van Riel,2021-04-13 A major feat of research and synthesis this book presents the first comprehensive history of the Dutch economy in the nineteenth century an important but poorly understood piece of European economic history Based on a detailed reconstruction of extensive economic data the authors account for demise of the Dutch economy's golden age After showing how institutional factors combined to make the Dutch economy a victim of its own success the book traces its subsequent emergence as a modern industrial economy Between 1780 and 1914 the Netherlands went through a double transition Its economy which in the words of Adam Smith was approaching a stationary state in the eighteenth century entered a process of modern economic growth during the middle decades of the nineteenth At the same time the country's sociopolitical structure was undergoing radical transformation as the decentralized polity of the republic gave way to a unitary state As the authors show the dramatic transformation of the Dutch political structure was intertwined with equally radical changes in the institutional structure of the economy The outcome of this dual transition was a rapidly industrializing economy on one side and on the other the neocorporatist sociopolitical structure that would characterize the Netherlands in the twentieth century Analyzing both processes with a focus on institutional change this book argues that the economic and political development of the Netherlands can be understood only in tandem

Het gevecht met de boeken. De uitgeversstrategieën van de familie Verdussen (1589-1689) Stijn Van Rossem,2014-06-24

This PhD study researches the editorial strategies of an Antwerp based family of printers the Verdussens Based on unique sources and on research done in Belgium Spain and Mexico this study wants to emphasize the role of the printer bookseller in early modern Europe as the main financier creator and distributor of the only mass medium of its time The strategical decisions of the Verdussen company allowed them to stay in business for more than two centuries in a politically and economically difficult times *Production and Consumption in the Low Countries, 13th-16th Centuries* Raymond van Uytven,2024-10-28 The subject of this volume is the relationship between production and consumption considered not only as the supply and demand sides of economic life but within the broader context of the societies of the Low Countries between

the 12th and the 16th centuries Amongst the topics covered are the reality of the so called late medieval depression comparisons between the great merchant cities of Bruges and Antwerp and the actual importance of the trade in art and luxury goods One group of articles then looks in detail at the cloth industry which remained the mainstay of the region s wealth and the effects upon it of changes in technology and in fashion while the volume concludes with two studies specially translated from Dutch on wine and beer consumption The Making of a Bourgeois State Marjolein C. 't Hart,1993 **The Rise and Decline of Dutch Technological Leadership (2 Vols)** Karel Davids,2008-08-31 Technological leadership is an important topic in economic history and the history of technology This book addresses the issue of technological leadership by means of an in depth study on the Dutch Republic once described as the first modern economy Drawing on extensive research in archives in Europe and a vast amount of printed sources and secondary literature it provides a wide ranging overview of Dutch technological leadership in the early modern Europe it explains whence this leadership came about and why it ended and it explores to what extent the Dutch case illuminates the evolution of technological leadership in general This book is thus relevant for the study of technological leadership the development of technology in the early modern period as well as the history of the economic expansion of the Dutch Republic The Rise of the Amsterdam Market and Information Exchange Clé Lesger,2016-12-05 Most scholars agree that during the sixteenth century the centre of European international trade shifted from Antwerp to Amsterdam presaging the economic rise of the Dutch Republic in the following century Traditionally this shift has been accepted as the natural consequence of a dynamic and progressive city such as Amsterdam taking advantage of expanding commercial opportunities at the expense of a more conservative rival hampered by outmoded medieval practices Yet whilst this theory is widely accepted is it accurate In this groundbreaking study Cl Lesger argues that the shift of commercial power from Antwerp to Amsterdam was by no means inevitable and that the highly specialized economy of the Low Countries was more than capable of adapting to the changing needs of international trade It was only when the Dutch Revolt and military campaigns literally divided the Low Countries into separate states that the existing stable spatial economy and port system fell apart and a restructuring was needed Within this process of restructuring the port of Amsterdam acquired a function radically different to the one it had prior to the division of the Netherlands Before the Revolt it had served as the northern outpost in a gateway system centred on Antwerp but with access of that port now denied to the new republic Amsterdam developed as the main centre for Dutch shipping trade and crucially the exchange of information Drawing on a wide variety of neglected archival collections including those of the Bank of Amsterdam this study not only addresses specific historical questions concerning the commercial life of the Low Countries but through the case study of Amsterdam also explores wider issues of early modern European commercial trade and economic development **Hoorn als stedelijk knooppunt** C. M. Lesger,1990 **Cities of Commerce** Oscar Gelderblom,2015-12-29 Cities of Commerce develops a model of institutional change in European commerce based on urban

rivalry Cities continuously competed with each other by adapting commercial legal and financial institutions to the evolving needs of merchants Oscar Gelderblom traces the successive rise of Bruges Antwerp and Amsterdam to commercial primacy between 1250 and 1650 showing how dominant cities feared being displaced by challengers while lesser cities sought to keep up by cultivating policies favorable to trade He argues that it was this competitive urban network that promoted open access institutions in the Low Countries and emphasizes the central role played by the urban power holders the magistrates in fostering these inclusive institutional arrangements Gelderblom describes how the city fathers resisted the predatory or reckless actions of their territorial rulers and how their nonrestrictive approach to commercial life succeeded in attracting merchants from all over Europe Cities of Commerce intervenes in an important debate on the growth of trade in Europe before the Industrial Revolution Challenging influential theories that attribute this commercial expansion to the political strength of merchants this book demonstrates how urban rivalry fostered the creation of open access institutions in international trade *De Franse Nederlanden: jaarboek* ,1985 De dam bij Wijk en het Kromme Rijngebied in de middeleeuwen A.A.B. van Bommel, K.M. Cohen, J. van Doesburg, T. Hermans, J.H. Huiting, J. Renes en K. van Vliet,2022-07-25 Negenhonderd jaar geleden 1122 2022 werd besloten de Kromme Rijn bij Wijk bij Duurstede af te dammen Met de aanleg van de dam werd de Lekdijk van Amerongen naar Vreeswijk geheel gesloten Het land in de lage broeklanden achter de dijk kon nu worden ontgonnen voor de landbouw Zonder dam zonder dijk en zonder ontginning zou het Kromme Rijngebied er tegenwoordig heel anders uitzien Daarom dit herdenkingsboek voorzien van veel illustraties en een groot aantal oude en nieuwe kaarten waarvan een deel nooit eerder is gepubliceerd Het boek beschrijft hoe het landschap er v r de afdamming uitzag waar mensen toen woonden en hoe zij het land gebruikten Het beantwoordt vragen als hoe en door wie het gebied is ontgonnen welke rol de Utrechtse bisschop had en hoe het water buiten de deur werd en wordt gehouden Daarnaast gaat het in op de latere ontwikkeling van dorpen en kastelen Bijna veertig jaar geleden verscheen het standaardwerk van Dekker Het Kromme Rijngebied in de Middeleeuwen Deze publicatie borduurt voort op dat werk en biedt nieuwe inzichten en bevindingen
