physical evidence and Lamb's expedition notes the authors identify a small area with archaeological sites where the carvings were likely produced. Remarkably the vividly colored lintels replete with dynastic and cosmic information can be assigned to a carver Mayuy who sculpted his name on two of them. To an extent nearly unique in ancient America Mayuy can be studied over time as his style developed and his artistic ambition grew. An in-depth analysis of Laxtunich Lintel 1 examines how Mayuy grafted celestial seasonal and divine identities onto a local magnate and his overlord from the kingdom of Yaxchilan, Mexico. This volume contextualizes the lintels and points the way to their repatriation and as an ultimate aim repatriation to Guatemala.

Volume 1 describes research design and proper analytic methods prior to conducting research as well as methods and considerations for capturing and handling wild animals and information on identification and marking of captured animals. It also includes new chapters on nutritional research and field sign identification and on emerging topics including structured decision making. Finally Volume 1 addresses measurements of wildlife abundance and habitat and research on individual animals. Volume 2 begins with a section on the relationship between research and management including public outreach described in a context that encourages engagement prior to initiation of management. An adaptive management approach is described as a cornerstone of natural resource management followed by a section on managing landscapes and wildlife populations. The volume also includes new chapters on ethics in wildlife science and conservation conflict resolution and management and land reclamation. A standard text in a variety of courses the *Techniques Manual* as it is commonly called covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages.
