Living Downtown Paul Groth, 1999-01-01 From the palace hotels of the elite to cheap lodging houses, residential hotels have been an element of American urban life for nearly two hundred years. Since 1870 however they have been the target of an official war led by people whose concept of home does not include the hotel. Do these residences constitute an essential housing resource or are they as charged a public nuisance? *Living Downtown*, the first comprehensive social and cultural history of life in American residential hotels, adds a much needed historical perspective to this ongoing debate. Creatively combining evidence from biographies, buildings and urban neighborhoods, workplace records and housing policies, Paul Groth provides a definitive analysis of life in four price differentiated types of downtown residence. He demonstrates that these hotels have played a valuable socioeconomic role as home to both long term residents and temporary laborers. Also the convenience of hotels has made them the residence of choice for a surprising number of Americans from hobo author Boxcar Bertha to Calvin Coolidge. Groth examines the social and cultural objections to hotel households and the increasing efforts to eliminate them which have led to the seemingly irrational destruction of millions of such housing units since 1960. He argues convincingly that these efforts have been a leading contributor to urban homelessness. This highly original and timely work aims to expand the concept of the American home and to recast accepted notions about the relationships among urban life, architecture and the public management of residential environments.
