creative imagination then an imaginationless generation may be our grim and inevitable future This book takes the reader whether an academic a parent or an educator through a startling journey from the harms lurking in the virtual worlds to children s health and well being to how they deal with representations of violence and sexuality as well as exposure to cyberbullying advertising Internet Addiction Disorder and even exploitation The most dangerous harm is unseen and affects the innermost realm of a child s psyche the imagination The authors discuss the current global regulatory framework that makes the protection of children ever more challenging They discuss lessons learned from the ways that courts have negotiated free speech issues as well as the research on parental mediation of children s Internet use in the home Finally they move towards a bold new attempt at understanding regulation by drawing lessons for new media from ancient culture In *The Imaginationless Generation* the authors pioneer an attempt to address the real harms that children face in virtual realities by presenting a new and paradigm shifting theory the Media Engagement They follow the theory s insights and predictions to offer a new perspective on a burning question of our time how to protect children online This multidisciplinary intellectual voyage and its insights are only possible by standing on the shoulders of scholars who have gone before such as Ellul Baudrillard McLuhan Postman and Piaget to name a few As academics parents and concerned human beings the authors present here the results of more than twenty years of research in a way that should appeal to a wide variety of readers as they stretch our understanding of the human machine interface beyond right and wrong This book shapes our understanding of media in the digital age in much the same way that McLuhan s *Understanding Media* did for a previous generation
