The Projective Use Of Mother-And- Child Drawings: A Manual Jacquelyn Gillespie, 2013-08-21 A unique and powerful new projective technique is now available to mental health professionals Based on the most primary of human relationships that between mother and child this technique is able to foster projections and identify perceptions of self and others that carry an unusually strong component of unconscious material Strikingly clear and accessible *The Projective Use of Mother and Child Drawings* is one of the few books on projective techniques to provide a consistent theoretical outlook and to address the very significant issues of transference and countertransference as they relate to this technique While firmly grounded in a psychodynamic view of personality development the volume also conveys a clinical outlook with applications suitable to a variety of theoretical paradigms The author comprehensively considers the theoretical and practical aspects of mother and child drawings and how to both use and assess them to gain insight into the most fundamental reaches of the self She consistently cautions against overly simplified interpretations of the drawings and stresses the importance of using conclusions drawn from them only as indications for further assessment confirmation or rejection The book is replete with examples of mother and child drawings from all age groups in both average populations and those with both mental and physical pathologies The volume opens with a careful discussion of the theoretical considerations behind mother and child drawings as well as the development and validation of projective drawing techniques in general The next section on research issues discourages diagnostic labeling in favor of making optimum use of the highly personal and idiosyncratic nature of these drawings This chapter features an interesting attempt to classify mother and child drawings in relation to size of the figures A particularly fascinating chapter on the impact of art on the therapist focuses on artwork done by professional artists who have addressed the mother and child theme The author explores and analyzes several thematic works of art from varying time periods and cultures It is her intent to help mental health professionals to explore their responses to pictorial art as individuals and thereby gain new understandings of related transference and countertransference issues with clients Chapter four provides clear instructions for administering mother and child drawings as a projective technique and guidelines for their interpretation This section provides samples and analyses of age typical drawings from the general population They vary greatly in style and artistic proficiency and are included to provide an idea of the usual developmental sequence of drawing characteristics from early childhood through the adult years Drawings of groups with demonstrated psychological pathologies or physical and developmental abnormalities comprise the final chapter This section approaches the interpretation of drawings by asking questions about how they communicate basic self and object relations issues This commanding volume of interest to students and professionals alike will provide art therapists school psychologists and mental health practitioners of all stripes with a powerful new projective technique to add to their professional armamentarium

Teaching and Learning Personality

Assessment Leonard Handler, Mark J. Hilsenroth, Mark Hilsenroth, 2013-06-17 How do we move from an understanding of the administration scoring and interpretation of responses on various personality assessment instruments to the ability to put our understanding into words and communicate it effectively to referral agents and to patients themselves And how do we transmit that ability to students Teaching and Learning Personality Assessment strives to fill a gap in the literature and in many training programs The editors have assembled a group of renowned clinicians noted not only for their own acumen in personality assessment but also for their teaching talent who present in detail time tested techniques for teaching assessment Readers have the opportunity to sit beside these seasoned mentors and learn their special skills Numerous examples illustrate the key concepts For every instructor of personality assessment who has ever pondered ways to organize a course or to convey difficult material and for every student who has worried about how to translate theory into practice in the context of a course or on his or her own this book will offer enlightenment and provide uniquely practical assistance It will be important reading for psychologists and trainees at every level of experience Its clear style vivid anecdotes frank discussion of disagreements in the field and innovative ideas make it an excellent text for both introductory and advanced courses *Current List of Medical Literature* ,1958 Includes section Recent book acquisitions varies Recent United States publications formerly published separately by the U S Army Medical Library **Handbook of Psychology, Assessment Psychology** John R. Psychonephrology 1 Norman B. Levy, 2013-06-29 Major nephrological and psychological organizations have at best set aside only small portions of their programs for papers or panels devoted to the psychological aspect of patients with end stage renal disease Thus the increased need for information concerning the psychological aspects of end stage renal disease has been met by occasional journal articles professional peer discussions small portions of national conferences and informal conversations and consultations with people with clinical and research experience in these areas The First International Conference on Psychological Factors in Hemodialysis and Transplantation arose out of a need to have a forum in which the major people involved in treatment and research in this area could share their latest work among themselves and with the registrants The initial encouragement for organizing such a conference came from the rank and file of nephrology social workers nephrology nurses and liaison psychiatrists and psychologists In early 1977 I had decided that I would make an effort to organize such a meeting and asked the two other individuals most closely identified with major research in this area Atara Kaplan De Nour and Harry S Abram to join me in planning this conference With their support and suggestions concerning the program I embarked upon an attempt to raise financial backing for it I was somewhat surprised to find that the many equipment and drug companies supporting nephrological conferences were not greatly interested in this one
