Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is depend ent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing **The**

Gilded Age Robert Swain Peabody and John Goddard Stearns Jr led one of the most popular and prolific architectural design firms in the Northeast securing more than one thousand commissions and building a vast and vibrant repertoire from warehouses and town houses to retail stores banks schools railroad stations libraries playhouses and country houses This survey is the first of its kind to focus on the firm s country house commissions offering a fascinating glimpse into the social and economic vitality that epitomized the era one that gave rise to a robust clientele for resort architecture and second homes Indeed the economic developments of the time spurred a vast market for houses of recreation and leisure time buildings including casinos boathouses stables gentlemen s farms and cottages all of which Peabody Stearns had a leading role in creating With this book Annie Robinson establishes Peabody Stearns as a significant contributor to the development of an American architecture in the late nineteenth and early twentieth centuries This comprehensive catalog showcases more than eighty of the firm s designs from Pierre Lorillard s The Breakers in Newport Rhode Island to William Forbes s cottage on Cape Cod James Ford Rhodes s Ravenscleft in Maine and Charles William Eliot s Sunshine in Northeast Harbor Maine While the bulk of the firm s commissions were located in New England notable works in the Middle Atlantic states and in the South and the West are also covered Containing over two hundred illustrations archival photographs plans and drawings Peabody Stearns tells the little known story of the two men who formed a lasting architectural partnership and displays the impressive collection of the homes across the country on which they left their imprint

Country Houses and Seaside Cottages of the Victorian Era William T. Comstock, 2012-08-09 This fascinating book presents a series of 44 designs for vacation homes of varying styles and sizes created over a century ago by a select group of New York and New Jersey architects Many of them are two story and most were intended to be built on low to medium budgets All of them reflect the ideals of comfort and charm and state of the art technology of the Victorian period The original publishers compiled a splendid variety of designs presented them as seaside and country houses and included designs for a Victorian club house pavilion school house and a small seaside chapel A total of 200 illustrations including perspective views front and side elevations and first and second story floor plans depict these appealing designs Occasionally the architects have specified construction materials and finishing details such as paint color and trim and in all cases they have included the overall anticipated costs which range from about 500 to about 9 000 The Victorians of course loved architectural embellishments of every kind and it is no small part of the charm of this book to study the profusion of gables porches portholes dormers porticoes chimneys pinnacles and more lavished on even the most modest designs Above all the houses and cottages appear to be both comfortable and reassuring appealing reminders of a gracious age long gone Those studying and working in the fields of architecture history and sociology will find in this wonderful book exuberant examples of a rich and charming architectural style Those who wish to join the growing number of home builders and restorers re-creating Victorian homes will find inspiration in each of these thoughtful designs

Reynolds,1929-01-01 The Colonial House Joseph Everett Chandler,2015-06-26 Excerpt from The Colonial House There is
at the present time a fortunately widespread and increasingly intelligent interest in the so called Colonial Style and
particularly in its application to home building This book has therefore been compiled in the hope that it may be of use to
those who admire the old examples and who wish to avoid in their possible building operations certain short comings
recognizable in much of the supposedly in the old vein modern work To such and perhaps only to the keenest of such portions
of Chapters III IV V VI and the latter part of Chapter IX may be found of interest and can equally well be avoided by those
who do not care to go into the more intimate details of the subject It is hoped that possible readers finding mistakes as to
dates of buildings or other misinformation will kindly report the same to the writer as their assistance in making the work
more comprehensive will be appreciated Equally gratefully received would be items regarding notable Colonial examples
with which the writer may not be conversant and particularly welcome would be enlightenment as to the designers of the
earlier houses of whom the traces are almost entirely lost About the Publisher Forgotten Books publishes hundreds of
thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important
