Wolfson, Gerald A. Epstein, 2013-02-21 The Great Financial Crisis that began in 2007 2008 reminds us with devastating force that financial instability and crises are endemic to capitalist economies This Handbook describes the theoretical institutional and historical factors that can help us understand the forces that create financial crises **Housing Policy in the Developed Economy** Bruce Headey, 2021-03-23 Originally published in 1978 this book analyses three main approaches to national housing policy in the 20th Century in Sweden the UK and USA It reviews policy developments and considers the

impact of policy on the housing conditions and costs of different sections of the community A major theme is that British and American governments contrary to their stated objectives have actually increased housing inequality by allowing homeowners tax concessions which are more generous than the housing welfare programmes available to tenants The political pressures which produced this outcome in Britain and the USA but a quite different and more egalitarian outcome in Sweden are carefully discussed Throughout the book policy making is regarded as involving trade offs between what is politically feasible and what is operationally feasible This framework enables readers to view policy making from the perspective of politicians and civil servants as they react to diverse demands and pressures and seek to devise housing programmes which embody incentives to which housing financiers builders and consumers will respond **The Routledge Handbook of Poverty in the United States** Stephen Haymes, Maria Vidal de Haymes, Reuben Miller, 2014-12-17 In the United States the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty The Routledge Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization Reorienting its national economy towards a global logic US domestic policies have promoted a market based strategy of economic development and growth as the obvious solution to alleviating poverty affecting approaches to the problem discursively politically economically culturally and experientially However the handbook explores how rather than alleviating poverty it has instead exacerbated poverty and pre existing inequalities privatizing the services of social welfare and educational institutions transforming the state from a benevolent to a punitive state and criminalizing poor women racial and ethnic minorities and immigrants Key issues examined by the international selection of leading scholars in this volume include income distribution employment health hunger housing and urbanization With parts focusing on the lived experience of the poor social justice and human rights frameworks as opposed to welfare rights models and the role of helping professions such as social work health and education this comprehensive handbook is a vital reference for anyone working with those in poverty whether directly or at a macro level Handbook of Regional and Urban Economics Gilles Duranton, Vernon Henderson, William Strange, 2015-06-29 Developments in methodologies agglomeration and a range of applied issues have characterized recent advances in regional and urban studies Volume 5 concentrates on these developments while treating traditional subjects such as housing the costs and benefits of cities and policy issues beyond regional inequalities Contributors make a habit of combining theory and empirics in each chapter guiding research amid a trend in applied economics towards structural and quasi experimental approaches Clearly distinguished from the New Economic Geography covered by Volume 4 these articles feature an international approach that positions recent advances within the discipline of economics and society at large Emphasizes advances in applied econometrics and the blurring of within and between cities Promotes the integration of theory and empirics in most chapters Presents new research on housing especially in macro and international finance contexts Introduction to Housing Katrin
