Houston68 Apollo 8 The Longest Journey

Buzz Aldrin, Ken Abraham

Houston68 Apollo 8 The Longest Journey:

#Houston68 Philip Gibson, 2015-05-28 What if there had been social media during the Apollo 8 mission to the Moon in 1968 This account will put you believably back inside those six tense and dramatic days in 1968 It is the story of the first manned mission to the Moon told in the form of today's social media allowing us to witness the unfolding drama of the mission as if we were following it in real time and as if the participants and observers were sharing their thoughts and actions with us directly In December 1968 so much remained unknown Would the first manned launch of the massive Saturn V rocket lift off and successfully deliver three astronauts into Earth orbit Would humans be able to survive passing through the Van Allen belts of radiation between the Earth and the Moon What would happen when the astronauts passed around the far side of the Moon out of contact with Earth Would the single engine needed to boost the spacecraft out of lunar orbit and on a course back to Earth fire as hoped Would the first nighttime recovery of a spacecraft from the Pacific Ocean be successful If the Apollo 8 mission was to be successful the astronauts on board would become the first humans to travel so incredibly far and so incredibly fast They would be the first to leave the Earth's sphere of influence and the first to see the whole planet Earth from space They would be the first to orbit the Moon first to set eyes on the far side of the Moon and the first humans to witness the spectacular Earthrise over the lunar landscape The narrative of this account is based on actual astronaut recollections NASA transcripts of the fascinating continual communications with the astronauts broadcasts of the main TV networks covering the mission and the thoughts of many laypeople observers There is an extensive list of major sources at the end of the book

Magnificent Desolation Buzz Aldrin, Ken Abraham, 2009-06-23 Forty years ago Buzz Aldrin became the second human minutes after Neil Armstrong to set foot on a celestial body other than the Earth The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history In the years since millions more have had their Earth-centric perspective unalterably changed by the iconic photograph of Aldrin standing on the surface of the moon the blackness of space behind him and his fellow explorer and the Eagle reflected in his visor Describing the alien world he was walking upon he uttered the words magnificent desolation And as the astronauts later sat in the Eagle waiting to begin their journey back home knowing that they were doomed unless every system and part on board worked flawlessly it was Aldrin who responded to Mission Control's clearance to take off with the quip Roger Understand We're number one on the runway The flight of Apollo 11 made Aldrin one of the most famous persons on our planet yet few people know the rest of this true American hero's story In *Magnificent Desolation* Aldrin not only gives us a harrowing first person account of the lunar landing that came within seconds of failure and the ultimate insider's view of life as one of the superstars of America's space program he also opens up with remarkable candor about his more personal trials and eventual triumphs back on Earth From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the moon before the decade was out Aldrin returned home to an Air Force career stripped of purpose or

direction other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour The twin demons of depression and alcoholism emerged the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him He burned through two marriages his Air Force career came to an inglorious end and he found himself selling cars for a living when he wasn't drunkenly wrecking them Redemption came when he finally embraced sobriety gained the love of a woman Lois who would become the great joy of his life and dedicated himself to being a tireless advocate for the future of space exploration not only as a scientific endeavor but also as a thriving commercial enterprise These days Buzz Aldrin is enjoying life with an enthusiasm that reminds us how far it is possible for a person to travel literally and figuratively As an adventure story a searing memoir of self destruction and self renewal and as a visionary rallying cry to once again set our course for Mars and beyond Magnificent Desolation is the thoroughly human story of a genuine hero

Rocket Men Robert Kurson, 2018-04-03 NEW YORK TIMES BESTSELLER The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon from the bestselling author of Shadow Divers Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy Andy Weir 1 New York Times bestselling author of The Martian and Artemis By August 1968 the American space program was in danger of failing in its two most important objectives to land a man on the Moon by President Kennedy's end of decade deadline and to triumph over the Soviets in space With its back against the wall NASA made an almost unimaginable leap It would scrap its usual methodical approach and risk everything on a sudden launch sending the first men in history to the Moon in just four months And it would all happen at Christmas In a year of historic violence and discord the Tet Offensive the assassinations of Martin Luther King Jr and Robert Kennedy the riots at the Democratic National Convention in Chicago the Apollo 8 mission would be the boldest riskiest test of America's greatness under pressure In this gripping insider account Robert Kurson puts the focus on the three astronauts and their families the commander Frank Borman a conflicted man on his final mission idealistic Jim Lovell who'd dreamed since boyhood of riding a rocket to the Moon and Bill Anders a young nuclear engineer and hotshot fighter pilot making his first space flight Drawn from hundreds of hours of one on one interviews with the astronauts their loved ones NASA personnel and myriad experts and filled with vivid and unforgettable detail Rocket Men is the definitive account of one of America's finest hours In this real life thriller Kurson reveals the epic dangers involved and the singular bravery it took for mankind to leave Earth for the first time and arrive at a new world Rocket Men is a riveting introduction to the Apollo 8 flight Kurson details the mission in crisp suspenseful scenes A gripping book The New York Times Book Review

Apollo 8 Jeffrey Kluger, 2018-05-01 The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968 NASA made a bold decision in just sixteen weeks the United States would launch humankind's first flight to the moon Only the year before three astronauts had burned to death in their spacecraft and since then the Apollo program had suffered one setback after another Meanwhile the Russians were

winning the space race the Cold War was getting hotter by the month and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken But when Frank Borman Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission they instantly signed on Written with all the color and verve of the best narrative non fiction Apollo 8 takes us from Mission Control to the astronaut's homes from the test labs to the launch pad The race to prepare an untested rocket for an unprecedented journey paves the way for the hair raising trip to the moon Then on Christmas Eve a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit And when the mission is over after the first view of the far side of the moon the first earth rise and the first re entry through the earth's atmosphere following a flight to deep space the impossible dream of walking on the moon suddenly seems within reach The full story of Apollo 8 has never been told and only Jeffrey Kluger Jim Lovell's co author on their bestselling book about Apollo 13 can do it justice Here is the tale of a mission that was both a calculated risk and a wild crapshoot a stirring account of how three American heroes forever changed our view of the home planet

Recognizing the pretension ways to acquire this books **Houston68 Apollo 8 The Longest Journey** is additionally useful. You have remained in right site to begin getting this info. get the Houston68 Apollo 8 The Longest Journey associate that we have enough money here and check out the link.
