How Cities Work Alex Marshall, 2000-12-31 Marshall writes with wit reason and style An excellent resource on the history and future of American cities Library Journal Do cities work anymore How did they get to be such sprawling conglomerations of lookalike subdivisions mega freeways and big box superstores surrounded by acres of parking lots And why most of all don't they feel like real communities These are the questions that Alex Marshall tackles in this hard hitting highly readable look at what makes cities work Marshall argues that urban life has broken down because of our basic ignorance of the real forces that shape cities transportation systems industry and business and political decision making He explores how these forces have built four very different urban environments the decentralized sprawl of California's Silicon Valley the crowded streets of New York City's Jackson Heights neighborhood the controlled growth of Portland Oregon and the stage set facades of Disney's planned community Celebration Florida To build better cities Marshall asserts we must understand and intelligently direct the forces that shape them Without prescribing any one solution he defines the key issues facing all concerned citizens who are trying to control urban sprawl and build real communities His timely book is important reading for a wide public and professional audience

Straphanger Taras Grescoe, 2012-04-24 Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution I am proud to call myself a straphanger writes Taras Grescoe The perception of public transportation in America is often unflattering a squalid last resort for those with one too many drunk driving charges too poor to afford insurance or too

decrepit to get behind the wheel of a car Indeed a century of auto centric culture and city planning has left most of the country with public transportation that is underfunded ill maintained and ill conceived But as the demand for petroleum is fast outpacing the world s supply a revolution in transportation is under way Grescoe explores the ascendance of the straphangers the growing number of people who rely on public transportation to go about the business of their daily lives On a journey that takes him around the world from New York to Moscow Paris Copenhagen Tokyo Bogot Phoenix Portland Vancouver and Philadelphia Grescoe profiles public transportation here and abroad highlighting the people and ideas that may help undo the damage that car centric planning has done to our cities and create convenient affordable and sustainable urban transportation and better city living for all **Community action and planning** Gallent, Nick,Ciaffi,

Discussing land use, urban planning, and environmental protection policies, the text explains the nature of the planning process. **Sustainable Nation** Douglas Farr, 2018-02-23 PROSE Award Finalist 2019 Association of American Publishers Award for Professional and Scholarly Excellence. As a follow-up to his widely acclaimed *Sustainable Urbanism*, this new book from author Douglas Farr embraces the idea that the humanitarian, population, and climate crises are three facets of one interrelated human existential challenge, one with impossibly short deadlines. The vision of *Sustainable Nation* is to accelerate the pace of progress of human civilization to create an equitable and sustainable world. The core strategy of *Sustainable Nation* is the perfection of the design and governance of all neighborhoods to make them unique exemplars of community and sustainability. The tools to achieve this vision are more than 70 patterns for rebellious change, written by industry leaders of thought and practice. Each pattern represents an aspirational, future-oriented ideal for a key aspect of a neighborhood. At once an urgent call to action and a guidebook for change, *Sustainable Nation* is an essential resource for urban designers, planners, and architects.

Emergent Urbanism Tigran Haas, Krister Olsson, 2016-04-29 In the last few decades, many European and American cities and towns experienced economic, social, and spatial structural change. Strategies for urban regeneration include investments in infrastructures for production, consumption, and communication, as well as marketing and branding measures and urban design schemes. Bringing together leading academics from across a range of disciplines, including Douglas Kelbaugh, Ali Madanipour, Saskia Sassen, Gregory Ashworth, Nan Elin, Emily Talen, and many others, *Emergent Urbanism* identifies the specific issues dominating today's urban planning and urban design discourse, arguing that urban planning and design not only results from deliberate planning and design measures but how these combine with infrastructure planning and derive from economic, social, and spatial processes of structural change. Combining explorations from urban planning, urban theory, human geography, sociology, urban design, and architecture, the volume provides a comprehensive and state-of-the-art overview, highlighting the complexities of these interactions in space and place, process, and design. *Design for Social Diversity* Emily Talen, Sungduck Lee, 2018-03-13 The most successful urban communities are very often those that are the most diverse in terms of income, age, family structure, and ethnicity, and yet poor urban design and planning can stifle the very diversity that makes communities successful. Just as poor urban design can lead to sterile monoculture, successful planning can support the conditions needed for diverse communities. This new edition addresses the physical requirements of socially diverse neighborhoods. Using the city of Chicago and its surrounding suburban areas as a case study, the authors investigate whether social diversity is related to particular patterns and structures found within the urban built environment. *Design for Social Diversity* provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity. *Design for Diversity* Emily Talen, 2012-07-26 The city is more than just a sum of its buildings; it is the sum of its communities. The most successful urban communities are very often those that are the most diverse in

terms of income age family structure and ethnicity and yet poor urban design and planning can stifle the very diversity that makes communities successful Just as poor urban design can lead to sterile monoculture successful planning can support the conditions needed for diverse communities Emily Talen explores the linkage between urban forms and social diversity and how one impacts the other Learning the lessons from past successes and failures and building from detailed case studies of different neighborhoods Design for Diversity provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity
